products
for 2020

MADE WITH LOVE

A lot has changed since Trek started in 1976, but not this: if we don't love a product we make, it won't find its way to you. It's a high standard, and that's exactly why we hold ourselves to it.

We're introducing a lot of great stuff this year, and these pages feature 20 of our favorites for 2020. We're proud to present them to you, and we hope they'll help you live a richer and more fun life outside.

Because if there's one thing we've learned in over four decades of designing and building products we love, it's that life is better when great bikes are a part of it.

Thanks for riding with us.

TREK ELECTRIC BIKES

This is going to change your life

Trust us, you have to try one.

If you know one thing about electric bikes, it's probably that they let you ride farther and faster with less effort. It's true. Electric bikes do those things. But as they've become more capable and sophisticated, they do something else that we believe is far more important: they bring people together.

In over 40 years of developing bikes for all kinds of riders, the most important lesson we've learned is that products are about people. We've also learned that riding is an experience that's best when it's shared.

And no matter how experienced or fit or fast a rider is, they deserve to share the experience with anyone they want to. These bikes make that possible.

FROM HO-HUM TO

HELL YEAH!

Allant+ pushes the boundaries of possibility. You'll go farther and see more from your saddle. Long commutes become quick joyrides. Big hills become big fun. Every errand becomes an excuse to ride. And your car becomes your backup plan. Whatever you do, wherever you go, life's bigger with Allant+.

10 models starting at $3,599.99
Available November 2019

Every aspect of Allant+ is thoughtfully designed to boost your ride

Integrated battery
The sleek, hydroformed frame fully encases the Bosch battery for a stylish, streamlined look.

Powerful assist
All models come with long-lasting Bosch batteries and high-end Bosch motors. Some models have an even faster Performance Speed motor.

Fully equipped
Each model comes with everything you need to ride, like fenders and lights that run off the battery.

Carbon performance
Our highest-end Allant+ bikes feature lightweight OCLV Carbon frames for a smoother, more compliant ride.

ALLANT+ 9.9S
30258 | $5,999.99

RANGE BOOST

DOUBLE YOUR DISTANCE

Range Boost seamlessly attaches an additional 500Wh battery to the down tube of your Allant+ so you can ride longer, commute farther, and adventure bigger. Your local bike shop can install Range Boost right away, or, as long as you choose a compatible model, they can add it later, too. Available on all Allant+ models except for Allant+ 7 Lowstep.

588519 | $1,099.99

JUST AS FUN GOING UP

2 THE ALL-NEW RAIL

Rail is a hard-charging e-MTB for riders who consider the trail a second home. It shreds just as hard as its non-electric brethren, then powers you right back up the mountain. So ditch your lift ticket—you're gonna send it, no shuttle necessary.

4 models starting at $4,999.99
Available November 2019

Burly suspension

A 160mm suspension fork and 150mm of rear travel let you rip rocky descents, hit big drops, and ride in places you never thought possible.

A new era for e-MTB

Bosch brings a new standard of power and performance to the trail with the all-new Performance Line CX drive system. It's light, compact, and responsive, and it delivers more range and less drag than ever before.

Smarter battery access

Trek's Removable Integrated Battery (RIB) system integrates the battery into the frame for protection and gives you easy, tool-free, driveside access. Turn the key and the battery pops out. It's that simple.

3

THE ALL-NEW POWERFLY

YOUR PLAYGROUND JUST GOT BIGGER

Powerfly electric mountain bikes are built for adventure-minded riders who want to explore more of the world. These e-MTBs are powerful, capable, and fun—and they're offered in multiple hardtail and full suspension options that will help you ride farther and faster, get up steeper climbs, and access more adventure on any trail.

4 models starting at $4,199.99

ENDLESS ADVENTURE

Which Trek e-MTB is right for you?

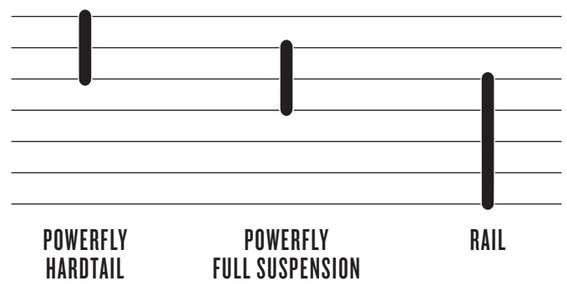

Trek electric mountain bikes give you everything you already love about mountain biking—only more of it. They ride like mountain bikes because they're mountain bikes first, built on a legacy of frame and suspension technology that prioritizes the rider. Whatever your riding style, these bikes will amplify it.

WHERE THEY THRIVE:

Dirt roads
Doubletrack
Singletrack
Rocky terrain
Pretty gnarly stuff
Jumps, drops, don't let your mom see you here
Places only chair lifts and crazy people go

NOTHING ELSE LIKE IT

4 THE ALL-NEW SUPERCALIBER

Good news—you no longer have to choose between a hardtail and a full suspension bike on race day. Supercaliber is a game-changing XC race bike in a category of its own. It gives you just the right amount of travel—60mm in the rear and 100mm in the front—to charge through the rough without losing speed or traction, climb efficiently, and put the hammer down in sprints.

The defining feature of this new category of race bike is Trek's exclusive IsoStrut shock—structural suspension that pairs 60mm of damped, tunable travel with unique pivotless seatstays that keep you smooth and fast.

4 models starting at $4,799.99
Available November 2019

A revolution in speed

IsoStrut is a structural, frame-integrated shock that delivers 60mm of rear travel so you can confidently speed through techy sections.

Built to win

Every model is built with an OCLV Mountain Carbon frame, carbon MTB wheels, a fork with 100mm of travel, and dual lockouts.

Pivotless seatstays

Supercaliber's flat, wide, pivotless seatstays eliminate excess linkages—along with the extra weight that comes with them.

Room for two

Supercaliber gives you the suspension you need for rough courses while still allowing you to carry two water bottles on the frame.

SUPERCALIBER 9.9 XX1

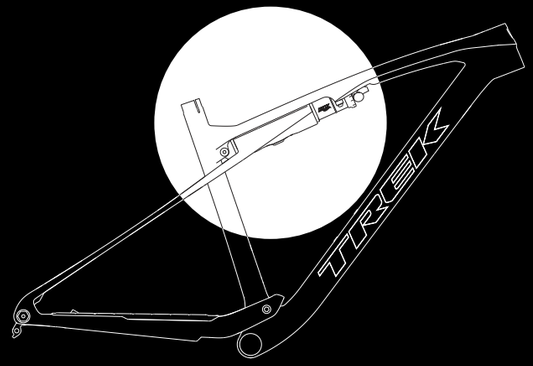

28518 | $9,499.99

HOW ISOSTRUT WORKS

THE MAGIC OF SUPERCALIBER

Supercaliber is hands down the fastest XC race bike we've ever made. It gets its game-changing speed from an ingenious frame-integrated suspension design called IsoStrut, which we created in partnership with engineers at FOX Factory Racing.

IsoStrut provides 60mm of damped, tunable rear travel—just enough for XC racers to charge through techy terrain without losing speed or traction.

Pivotless seatstays

When you add extra linkages to a bike's design, you get excess weight and lateral motion. That's not efficient, and it's not fast. Supercaliber engineers ditched the rear pivot and designed it with wide, flat seatstays that bow vertically, not laterally. They keep the rear of the bike stiff and give it the responsive feel of a hardtail.

Anti-rotation, anti-deflection

IsoStrut is encased in a structural stanchion that prevents twisting, flex, deflection, and shock damage. You get the direct power transfer and racy feel of a hardtail, with a short-travel shock that soaks up the trail's fatiguing bumps.

Lightweight, structural speed

Standard full suspension bikes have a separate shock and linkage system, but IsoStrut was designed to be a structural part of Supercaliber. This design eliminates the extra hardware and parts normally associated with full suspension bikes, and the extra weight along with them.

Damped and fully tunable

IsoStrut uses a standard shock pump so you can tune the spring rate for your weight, and it has a dial for adjusting rebound and a lockout. It's serviceable like any other shock, with seals, bushings, and oil that can be replaced by a qualified technician. Plus, it includes volume spacers that increase bottom-out resistance for large or especially aggressive riders.

5 THE ALL-NEW FUEL EX

IF YOU WANT ONE BIKE THAT DOES IT ALL, PICK THIS ONE

Fuel EX is a full suspension bike that's made to hit every trail, every day. From epic long-distance rides to rowdy local trails after work, Fuel EX's balanced geometry and sweet-spot suspension setup give you the confidence for descents and the heart for climbs. We don't think you should have to choose just one mountain bike. But if you do, choose this one.

6 models starting at $2,099.99

Better for women, better for everyone

We've expanded the sizes available on our most popular bikes. Now they're all women's models—and they're also right for all genders.

We've made some major design changes to our all-new Fuel EX, Domane, Checkpoint, and Émonda lineups to ensure there's a perfect fit for all riders. Instead of having a select few models targeted toward women, we have more sizes and more colors for everyone.

We believe every rider—regardless of gender, body type, riding style, or ability—deserves a great bike. One that gets you excited to hop in the saddle and ride. A bike that makes you want to go faster and farther than ever before. A bike that feels like it was made just for you. Because it was.

6

THE ALL-NEW TOP FUEL

RACE FAST, PLAY HARD

This full suspension ripper is right for riders who always take the fastest line, even when there's a jump in the way. It has XC racing in its DNA, but it comes ready to shred.

5 models starting at $3,299.99

Sure-footed speed

Top Fuel's relaxed geometry lets you rip without the twitchy handling of a traditional XC bike.

Always fast, always efficient

Top Fuel's 120mm front and 115mm rear suspension travel makes technical descents less sketchy, but it's still so efficient you'll want to keep crushing climb after climb.

Dressed to party

Wider bars and shorter stems give you more steering control, and wider 2.4" tires give you more grip.

Get low

A dropper gets you in the best position to lean the bike harder into corners and drop in to steeper descents.

THREE NEW BIKES. ONE IMPORTANT DECISION.

All three of our all-new mountain bikes are sweet. Which one is right for you?

There's a lot to consider when choosing your new mountain bike. And, let's be honest—you're gonna have a good time on any one of our three all-new mountain bikes. But each is designed for a specific kind of riding.

If you're an XC racer looking for flat-out speed on singletrack, you'll find no better bike than the super-lightweight Supercaliber—the same bike ridden by the pros of Trek Factory Racing XC. But if you're more into all-around good times on the trail and want a bike that'll keep rolling when you miss your line, you'll find a better match in Top Fuel or Fuel EX.

Best way to know for sure? Try it where you'll ride it. Contact your local Trek retailer to learn about their demo and rental programs.

WHERE THEY THRIVE:

SUPERCALIBER	TOP FUEL	FUEL EX
Elite XC racing		
Singletrack suffer fests		
	Marathon rides and multi-day events	
	Fun times on the trail for all skill levels	
		Rock gardens, rooty and technical trails

7 THE ALL-NEW DOMANE

GOES FAST, FEELS SMOOTH

16 models starting at $859.99

“Trek’s best road bike ever”

– Bicycling Magazine, July 2019

The all-new Domane is the smartest, fastest, and most versatile endurance road bike we’ve ever made. It has an all-new, more aerodynamic frame and the same road-smoothing IsoSpeed tech that lets you ride longer with less fatigue—along with new integration features that make it the perfect all-around road bike.

DOMANE SLR 9
30034 | $11,299.99

BONTRAGER INTERNAL
TOOLS & STORAGE

STOW IT, DON'T SHOW IT

When it comes to carrying your ride essentials, a saddle pack or jersey pocket will do the job. But these solutions aren't always the most comfortable or secure.

Frame-integrated storage now comes standard on carbon Domane and Fuel EX models—and with the Bontrager BITS Internal Frame Storage Bag you can neatly pack away your spare tube, flat kit, tools, and other treasures.

This system keeps your gear out of sight but close at hand so you can focus on your ride.

Included BITS configurations and accessories vary by bike model

*User discretion advised. We recommend stowing tools, not hot dogs.

ALL-NEW R3 ROAD TIRES

RACE-DAY FAST, EVERYDAY DURABLE

We overhauled our R3s to create a family of fast, sleek, and confidence-inspiring tires built to hold up wherever you roam. They're supple and durable enough for everyday riding, yet speedy and efficient enough to run on race day. It's a winning combo for riders who favor time in the saddle over time swapping rubber, and it makes these the best R3s we've ever created.

Three years in the making

The all-new R3 is more than just a tire. It's the culmination of three years of revolutionizing the way we develop and test tires. Instead of testing them on a steel drum, we created a customizable rolling surface capable of recreating several outdoor riding conditions. Then we gathered and analyzed loads of performance data to determine the best way to build the R3.

The tech behind the tire

We wanted to engineer R3 with the most advanced design and materials possible. So we tested everything from tire widths and rubber compounds to tread patterns and puncture protection systems. Our most exciting discoveries? Bigger, wider road and gravel tires can roll faster. The same tire layup can roll faster in one direction versus the other—in some cases by more than 10%.

Direction matters

R3 starts with a supple, 120 TPI casing that's directionally optimized for faster forward rolling. In other words, you get more free speed.

All-new rubber

We went back to the drawing board and totally reworked our rubber to create the proprietary TR-Speed compound, which helps deliver a tire that's faster in the lab and faster on the road.

Improved puncture protection

R3 features Hard-Case Lite with Nylon105 puncture protection. It's lighter and has a stronger breaker belt, resulting in a tire that feels great and holds up better against punctures.

Added traction

The R3's modern, lightly-treaded design adds traction and cornering confidence. As the tire size increases, the tread becomes more pronounced, perfect for aligning tire size with intended use.

Starting at $54.99

10 ALL-NEW WAVECEL HELMETS

A major advancement in the protection against cycling-related head injuries

WaveCel is a revolutionary, Bontrager-exclusive helmet technology that has been shown in a recent study to be up to 48x more effective than traditional foam helmets in protecting your head from injuries caused by certain cycling accidents.*

*See Evaluation of a Novel Bicycle Helmet Concept in Oblique Impact Testing, Accident Analysis and Prevention 123 (2019) 58-65. www.trekbikes.com/what-is-wavecel. Based on reduction in rotational acceleration at impact (6.2 m/s at 45°) of head + neck model wearing traditional EPS foam helmet vs. helmet modified with WaveCel insert. Probability of injury in an actual accident depends on numerous factors, including nature of impact and individual health

XXX WAVECEL ROAD HELMET

Trek-Segafredo's WaveCel helmet of choice and the best in high-performance protection, comfort, and aerodynamics

25365 | $299.99

BLAZE WAVECEL MTB HELMET

Serious protection for serious trails, with an integrated mount for a Bontrager light or GoPro™.

Safety and style for commutes, e-bike rides, and everyday adventures.

25368 | $149.99

DID YOU KNOW?

WE HAVE A CRASH REPLACEMENT GUARANTEE

If you crash within the first year of ownership we will replace your helmet with a brand new one.

11

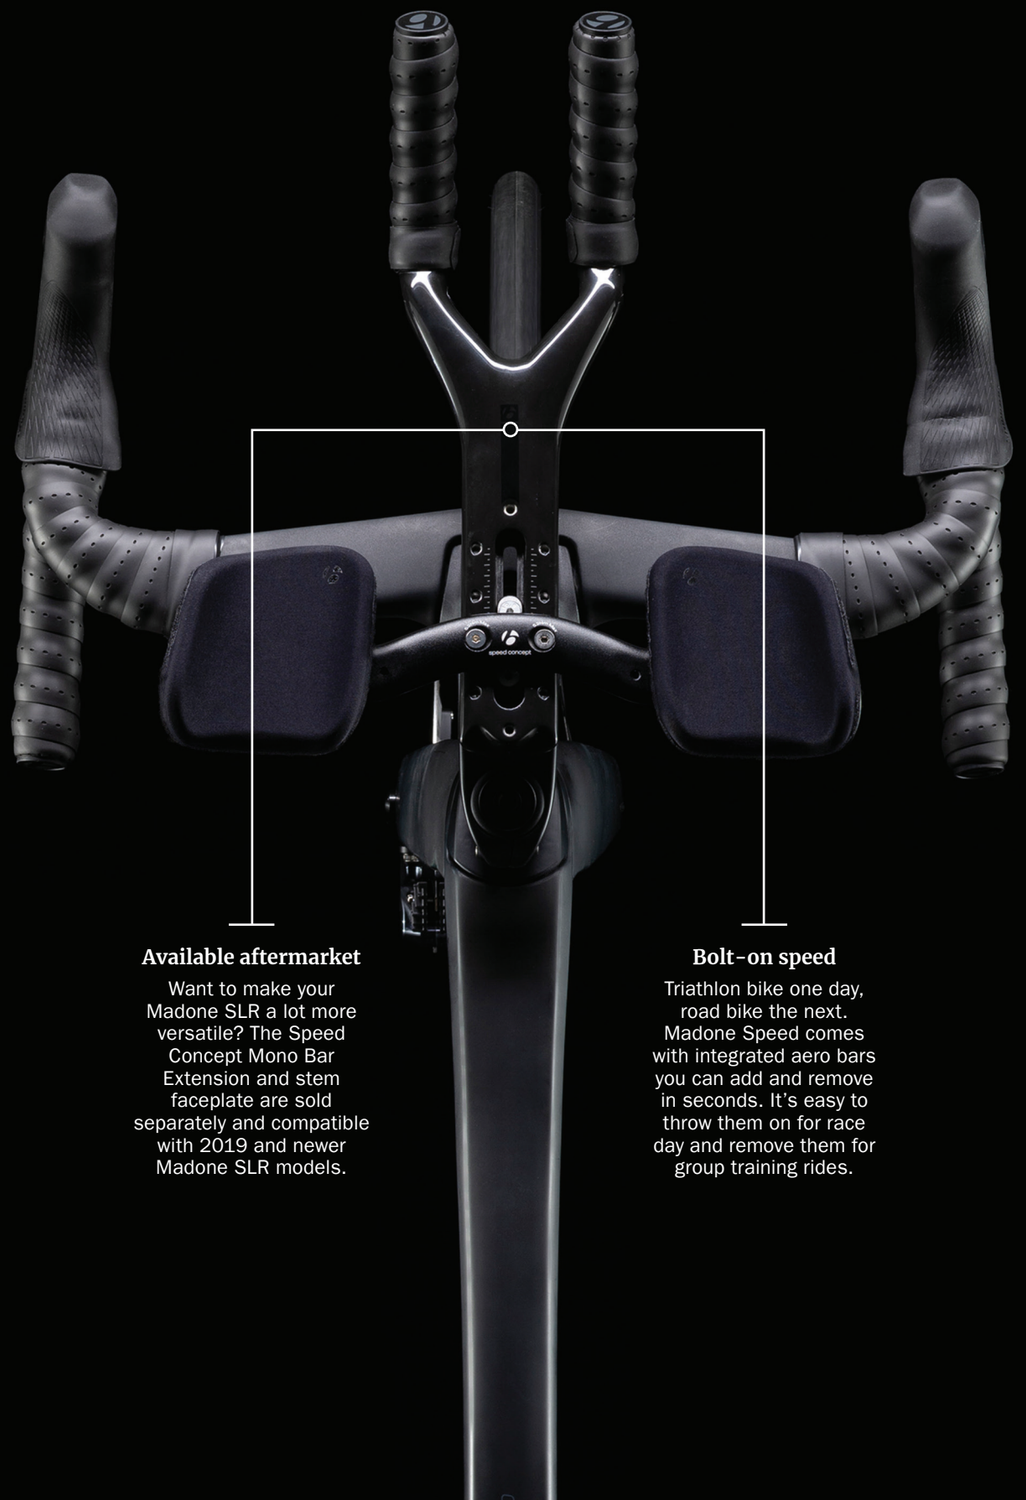

THE ALL-NEW MADONE SPEED

THE SMARTEST SETUP FOR MOST TRIATHLETES

Madone Speed has the ideal balance of aerodynamics, light weight, and comfort. If triathlon's not a full time job and you want one bike you can ride, train, and race on, this is the perfect choice.

28014 | $6,499.99

Available aftermarket

Want to make your Madone SLR a lot more versatile? The Speed Concept Mono Bar Extension and stem faceplate are sold separately and compatible with 2019 and newer Madone SLR models.

Bolt-on speed

Triathlon bike one day, road bike the next. Madone Speed comes with integrated aero bars you can add and remove in seconds. It's easy to throw them on for race day and remove them for group training rides.

STEP INTO GREATNESS

Treat your feet to the finer things in life with Bontrager's all-new high-end shoes. XXX is super lightweight and incredibly stiff, with a renowned tailored fit and unparalleled pedaling efficiency. If you're looking for a shoe that's professional grade from heel to toe, you've found it. Clear a space on your top shelf, because the best just got better.

XXX ROAD SHOE
25000 | $399.99

XXX LTD ROAD SHOE (SHOWN)
29082 | $449.99

Innovation from the inside out

When you slip on XXX, you benefit from a tongue that wraps from the inner to outer foot, optimized flex-zones, and a specifically engineered heel cup with no-slip lining for ultimate comfort and control.

First-rate fit

Dual IP1 Boa® dials let you make precise micro-adjustments so you can customize your fit to best suit your needs.

Function laced with luxury

Superior Form TX lace routing system takes the pressure off the top of your foot and allows for additional adjustability and a more secure fit.

Perfect perforation

XXX is swathed in a luxurious, lightweight material with 360 degrees of perforation for utmost breathability and comfort.

A stiff spirit

XXX features a 100% OCLV Carbon sole that's exceptionally lightweight and stiff for incredibly efficient power transfer.

XXX MOUNTAIN SHOE

Just because you like to get muddy doesn't mean you can't be fancy. Maybe you drink your post-ride beer with your pinky out. Maybe you always don a suit coat over your tech tee. Or maybe you just wear the most sophisticated mountain shoe on the planet. When you wear XXX, you're gracing your feet with the fastest, stiffest, most luxurious materials available.

2 models starting at $399.99

Scuff saver

Integrated GnarGuard on the XXX mountain shoe protects your investment against abrasions and debris. The newest version also features extra flexibility to conform to the top of your foot.

Uncompromising performance

Race-ready Tachyon rubber lugs on the XXX mountain shoe give you great traction and stability if you ever need to dismount on the trail.

PROJECTONE

NEW ICON PAINT SCHEMES

MAKE YOUR GROUP RIDE A GALLERY

13

Project One ICON is a collection of premium paint schemes that turn your custom ride into a true work of art. This year, our paint designers added two new options to the palette—Molten Marble and Cosmos—that'll turn heads in this world and beyond.

MOLTEN MARBLE

Pearly Red Lava/Smoky Chrome Swirl

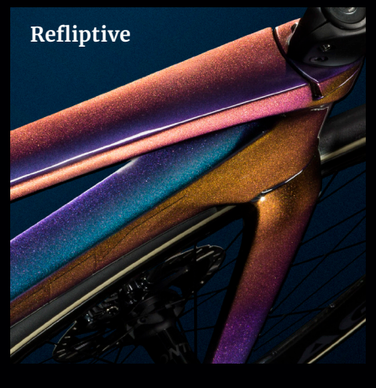

Molten Marble brings the heat. With hypnotizing swirls of pearly red lava and smoky chrome, this paint scheme is a real force of nature. Available with or without Trek-Segafredo race team logos.

PROJECT ONE

ICON
Works of art

These bespoke designs are about more than colors that stand out: they're filled with texture, depth, and mood. Each ICON showcases a mastery of brush and paint and reflects the passion the most experienced Project One artists bring to their craft.

Immerse yourself in all six Project One ICON schemes at trekbikes.com/project-one-icon.

14 BALLISTA KNIT ROAD SHOE

COOLEST. SHOES. EVER.

Bontrager's all-new Ballista Knit road shoe keeps you cool and comfortable when the days are warm, your rides are long, and the bunch sprints are heated.

It's built with a lightweight knit material that proves you don't need to sacrifice comfort for performance. Plus, it's fast, light, and built to contour to your foot for a custom feel.

30212 | $324.99

Dial your fit

The heel-mounted Boa IP1 dial and unique Heel Reel lacing system draws your foot down and back for a secure fit.

No waste, all win

A lightweight OCLV Carbon sole and Bontrager's high-performance, ergonomic last turn your pedal power into speed.

Stitched to win

A super-breathable, lightweight knit material with a durable water repellent coating keeps you cool and comfortable.

15

AVERT STORMSHELL JACKET

WEATHER ANY STORM

The ultra-lightweight, super-packable Avert Stormshell mountain bike jacket keeps you protected through fall's unexpected storms and rain showers. It's lightweight, waterproof, and available in men's and women's cuts. Roll it up and stow it in a pack or pocket—you won't even notice it's there until you need it.

MEN'S AVERT STORMSHELL JACKET
24972 | $199.99

WOMEN'S AVERT STORMSHELL JACKET
24718 | $199.99

16

ALL-NEW PRECALIBER

CHILDHOOD IS BETTER IRL

Bikes give kids the chance to get away from screens, have fun, and find freedom. Precaliber introduces them to the joys of riding and makes it easier for them to learn and grow their skills, whether they're practicing turns in the driveway, racing down the sidewalk, or taking a family spin around the neighborhood.

12 models starting at $219.99

Kid-friendly features

Precaliber is designed specifically for kids, by people who know bikes. They're lightweight, built to hold up to rough and tumble play, and have size-appropriate grips, levers, pedals, and saddles.

Easy to hop on and off

Precaliber's frame is lower than most kids' bikes, which provides more confidence when mounting and dismounting.

Handle or light—you choose

The kid-sized saddles have an integrated handle for easy lifting and guiding while they ride. It can be swapped out for a tail light to boost visibility if you choose.

Wide tires, more traction

Wider tires are more stable and offer better grip. They make kids even more confident and comfortable while riding.

17

CIRCUIT LONG SLEEVE JERSEY

MADE FOR FALL MORNINGS

You know the ones—when the air is brisk and the leaves are ablaze with change. The sights and sounds of autumn are, without a doubt, better from the saddle of your bike. But sometimes dropping temperatures call for something with a bit more coverage.

For cooler days when you need an extra layer, reach for the Circuit long sleeve jersey. This staple piece offers lightweight coverage, moisture management, and UV protection perfect for transitioning between seasons.

MEN'S CIRCUIT LONG SLEEVE JERSEY
22785 | $109.99

WOMEN'S CIRCUIT LONG SLEEVE JERSEY
22793 | $109.99

Just the right weight

Not too warm, not too cool. Profila Dry fabric delivers the perfect amount of breathability and moisture management for those between-season rides, and it features UPF 30+ fabric for protection against harmful UV rays.

Fit for riding

This jersey has a streamlined cut, a drop-tail design that keeps you covered when you're pedaling, and lengthened cuffs that won't find their way up your forearms mid-ride.

Pockets on pockets

Carry all your ride essentials with three open-back pockets, one zippered security pocket, and an innovative front pocket where you can stow wrappers until you can find a place to recycle them.

18

AEOLUS ELITE SADDLE

SIT BACK, GET COMFORTABLE— YOU'RE ABOUT TO GO FAST

Bontrager's all-new Aeolus saddles keep you comfortable in a tucked aero position so you can beat the wind and ride faster.

Best of all, they provide targeted support for riders of all genders and body types, so they make the perfect aero add-on for anyone.

27094 | $149.99

Blendr integration

Attach a Blendr accessory mount to the rear of this saddle for clean integration with any Bontrager Flare rear light. You'll still have enough room for a seat pack, too!

Full cutout

The split design and full saddle cutout minimizes pressure on soft tissue areas and allows for a more powerful, rotated posture.

The right flex

The rails are housed at the very front of the saddle, which allows the entire saddle shell to give you a great fit and feel.

Wide nose

The wide nose and shorter overall length delivers comfort whether you're on the hoods or the drops.

"I just rode over 2100 miles in the Tour de France, and I never once dreaded getting back in this saddle."

RICHIE PORTE
Trek-Segafredo

19

ALL-NEW BONTRAGER LIGHTS

DON'T GET LEFT IN THE DARK

Most bike headlights start dimming after 15 minutes, but Bontrager lights are built with lumens that last. These all-new lights outshine the competition for the full duration of your ride. Stay bright through fall's shorter days with these all-new front lights for the road, trail, and anywhere else you ride.

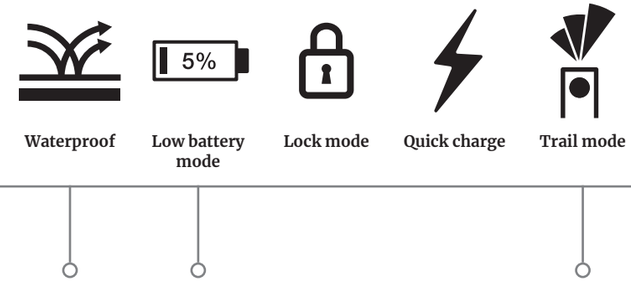

ION PRO RT

This 1300-lumen light is the perfect torch for nighttime trail rides in the fall—as well as your commute to the trailhead. It has a wide beam, great brightness, a long run-time (an hour and a half at 1300 lumens and three hours at 800 lumens), and visibility from 2km, away even when the sun is shining.

552373 | $124.99

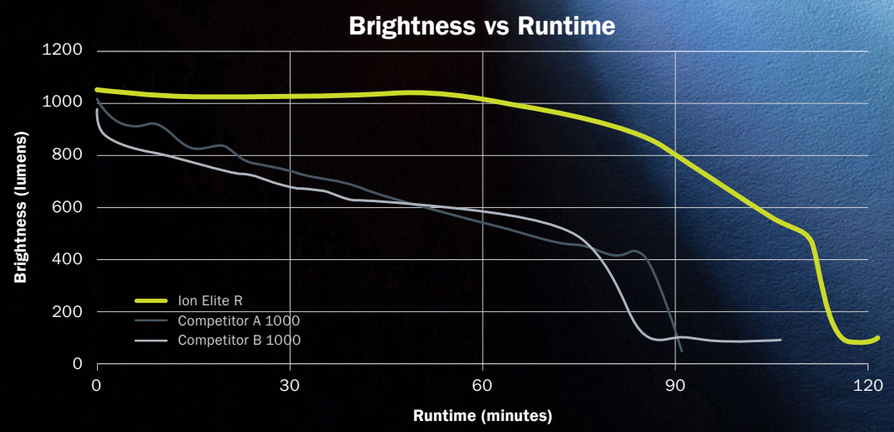

Which light is right?

Waterproof | Low battery mode | Lock mode | Quick charge | Trail mode

TRUTH IN LUMENS

Ion Elite R provides 1000 lumens of lasting brightness. Unlike other lights, which start strong but are quick to fade, Bontrager lights outshine the competition for the full run time.*

*Fully charged, new lights tested with a Bausch and Lomb integrating sphere every five minutes. Test done at room temperature, with lights air-cooled with a fan. Consistent test protocols were used throughout. Note that light output will degrade with age of lights and battery.

ION ELITE R

This powerful addition to the best-selling Ion family delivers 1000 lumens and a wide beam that's perfect for the road, path, or trail. It's USB-rechargeable and designed for sustained brightness (it'll run for an hour and a half at full power, three hours at 650 lumens, and six hours at 350 lumens). Plus, it features five modes, including day- and night-flash, and can be seen from over 2km away, even during daylight hours.

553813 | $99.99

DESTINATION ANYWHERE

Checkpoint is the only bike you'll ever need. It's our most versatile model ever, designed for gravel but fully capable of so much more. Whether you're riding for fun, commuting to work, or you're just getting into gravel riding, Checkpoint does it all.

Not sure where your adventure is headed? Hop on Checkpoint. And remember—roads are really just suggestions. The true adventure begins where the pavement ends.
