ALHONGA Enterprise CO., LTD.

Was founded in Taiwan in 1981. The main manufacturing products are related to brake systems for the bicycle industry. Nowadays, ALHONGA
TAIWAN has transformed into a role providing OEM and ODM services to satisfy all of our customers around the world.

To guarantee a safe product for our customers a whole new EN Lab was separately equipped in the beginning of 2007. Because of this, our customers will always be satisfied with the best possible quality control from the ALHONGA EN Lab.

Looking at the future, ALHONGA is still moving forward through non-stop R&D work, stable quality and the invention of innovative new products to satisfy our customers continuously. The ALHONGA mission is to be a quality-product provider and to offer the end-user an enjoyable bike experience.

Slidepad® Technology

Enhanced Safety

Slidepad prevents accidents due to misuse, inexperience, or confusion with front/rear brakes. Slidepad eliminates over the bar and front wheel slipping accidents.

Single Lever Operation

One brake lever adds much needed simplicity to the user experience of riding a bike.

Improved Braking Performance

46% better stopping distance than rear brake only for more confident, more controlled stops.

How Slidepad Works

1. Rider Uses Single Lever to Engage Rear Brake

2. Slidepad Makes Contact With the Rear Rim

3. Pad Slides Forward to Pull Front Brake Cable

How Slidepad Prevents Head Over Handlebar Accidents

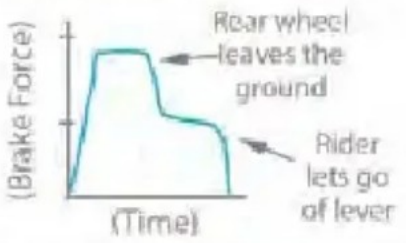

Rear Wheel Starts to Leave the Ground

Pad Slides Back to Reduce Front Brake Force

Front Brake Force Changes

How Slidepad Prevents Front Wheel Washout Accidents

Rear Wheel Starts to Slip on the Slippery Surface

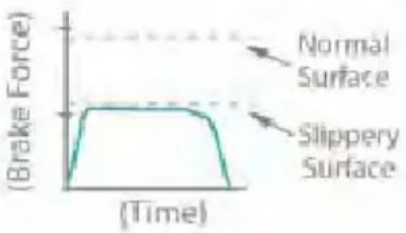

(Slippery Surface)

Slipping Wheel Causes Pad to Slide Less, Limiting Front Brake Force

(Slipping) (No Slipping)

Front Brake Force is Limited
