TECHNOLOGIES

OrthoLite

OrthoLite is the world leader in performance insoles combining high levels of breathability with excellent cushioning and long term wear properties. Due to its open cell structure, OrthoLite offers both a cooler and drier shoe environment by allowing moisture to move away from the foot during wear. Keeping the interior of the shoe drier, reduces any friction and heat build up inside the shoe. ere is also an EPA/FDA approved anti-microbial imbedded in the foam to fight fungus, bacteria, and odor creating a healthier shoe interior. In addition, the long term cushioning properties create a consistent fit and comfort level for the life of the shoe. is combination of cooler, drier, healthier, and long term cushioning properties transforms the comfort levels of any footwear. OrthoLite insoles are also washable and will retain all of their performance properties after washing. From first step to last, OrthoLite will enhance the comfort of any shoe on multiple performance levels.

Vibram

Each Vibram sole has been designed to offer maximum performance, comfort and durability to even the most demanding user. With almost 70 years of experience, Vibram produces 50 mixtures and 400 models. Each one of them undergoes rugged tests and stringent controls. Vibram soles make the best shoes to wear, delivering superior grip and traction.

COOLMAX

Coolmax® is a high tech fabric specifically and uniquely engineered to keep users dry and comfortable. Coolmax® fabrics are made from specially engineered polyester fibres from ADVANSA with an increased surface area. Is special four-channel or six-channel fibre forms a transport system that pulls moisture away from the skin to the outer layer of the fabric. It then dries that moisture faster than other fabrics to thermoregulate the body by evaporative cooling.

DRY SKIN QUICK DRY & ANTIODOR

Developed for users who are active outdoors. Extremely light weight, smooth and breathable fabrics that allow perspiration.

SKIN STRETCH WARMTH

Developed for all active outdoors who privilege freedom of movements.

SKIN COUER PRO WATERPROOF & BREATHABILITY

Developed for users who are active outdoors. Breathable fabrics that allow perspiration to evaporate easily and provide good protection against water and wind. 5000 mm waterproof.

SKIN COUER WATERPROOF & BREATHABILITY

Developed for users who are active outdoors. Breathable fabrics that allow perspiration to evaporate easily and provide good protection against water and wind. 1000 mm waterproof.

BODY SHIELD EXTREME WEATHER RESISTANT

Developed for users who are very active outdoors. Highly weather resistant, combines waterproof, breathability, elasticity and abrasion resistance, with excellent thermic characteristics.

BODY SHIELD PRO WEATHER RESISTANT

Developed for users who are very active outdoors. Highly weather resistant, combines waterproof, breathability, elasticity and abrasion resistance, with excellent thermic characteristics.

WIND SHELTER PRO WINDPROOF

Designed for outdoor activities in order to prevent cold air and water from passing through, allowing for sweat to evaporate easily. Built with extremely light and breathable fabrics providing maximum comfort.

WIND SHELTER WINDPROOF

Developed for users who are active outdoors and designed to prevent cold air from penetrating the fabrics and perspiration to evaporate easily, providing warmth and comfort.

driveiease

Removes perspiration fast. Dries 4 x faster than cotton. Freshguard prevents odor. Patented permanent performance. Won't shrink or lose shape

ACFC ADVANCED CARBON FRAME CONSTRUCTION

Our [redacted] is built with a unique high modulus construction.
The carbon layers are highly compressed and strengthened to provide a stiffer frame.

ALFA 61 ALUMINIUM LIGHTWEIGHT FRAME 6061

Aluminium 6061 series. Great compromise between strenght and weight.

SL 61 ALUMINIUM SUPER REINFORCED FRAME 6061

Maximum strength aluminium frame.

ALC 61 ALUMINIUM CITY FRAME 6061

Alloy 6061 with special design to garantee minimum weight and maximum comfort.

ASLF 61 ALUMINIUM SUPER LIGHTWEIGHT FRAME 6061

Super light Aluminium with [redacted] shape to guarantee maximum strength and low weight.

AERO 61 AERO SUPER LITE FRAME 6061

Special designed frame with aero profiled tubes to insure less dr ag.
This will help you save some energy for the right moments.

ALF 05 ALUMINIUM LIGHTWEIGHT FRAME 7005

Special mixtures of metals into the aluminium to create a unique tube.
It retains more of its hardness after welding than other alloys, enabling less material use while maintaining high strength. It can be radically manipulated, allowing a truly optimized tubeset and a great look.

LAH 61 LITE ALUMINIUM HYDROFORM FRAME 6061

Super light Aluminium with [redacted] shape to guarantee maximum strength and low weight. We locate these tubes on specific points to obtain a better pe rformance and also a quite comfortable exercise.

AXLF 66 ALUMINIUM XTRA LIGHTWEIGHT FRAME 6066

Double butted tube for extra rigidity and low weight.

29 NFG 29" BIKE FRAME GEOMETRY

Special 29 inche MTB wheel.

650 27,5" FRAME GEOMETRY

Special 27.5 inche MTB wheel.

CITY SPECIAL CITY FRAME DESIGN

Special design for the cyclist to experience a secure and comfortable ride on the city.

SPECIAL GEOMETRY POSITION CONTROL

Special designed geometry for leisure riders who are looking for an extra comfortable position.

RACE TUBE GEOMETRY

Racing proven geometry. For racers looking for maximum performance.

SPORT TUBE GEOMETRY

Comfort based design for the first r ides on trails.

WOMAN SPORT TUBE GEOMETRY

Comfort based woman design for the first r ides on trails.

EXPERT TUBE GEOMETRY

Geometry specially designed for expert riders.

EPA ELECTRIC POWER ASSISTANCE

Electric power assisted bike will provide a extra boost to help you in your daily rides.

LINK SUSPENSION

Independent Rear Suspension design. Is designed to work independently on the loads of the braking system and pedalling. It will provide a better control and even a better performance. You'll just have to ride it as fast as you can.

DIRECT DRIVE FEEL

Full suspension system who connect the rear triangle to front by two links who c an offer good braking, pedaling and pedal kickback performance. For riders who loves the clean feel of terrain with great control.

AFSS ACTIVE FULL SUSPENSION SYSTEM

Rear suspension System to garantee comfort on every bump.

LITE HI TEN FRAME TUBE

Special Steel Hiten tube series. Very stiff compared to a regular steel frame.

FPS FRAME PROTECT SYSTEM

[redacted]

FS FULL SUSPENSION

All round bicycle with [redacted] system to absorb impacts with control and comfort during your rides.
