The NEW DESCENDER™ is the product of three years development and racing experience with more than positive results. What all this means to you is a more stable and comfortable ride. The new ground control suspension is designed to give maximum power and pedaling efficiency on those killer hill climbs while still soaking up the roughest ground Mother Nature can provide. The Descender can take you to your limits and beyond or, if you just want to stay down-to-earth, it makes an easy handling, comfortable Enduro bike. Whether your order the Attack Descender or the Enduro Unit*, what you get is the most advanced ATB available. It is also the most unique and well mannered bike you will ever own.

* Available February 1, 1985

This Exclusive C-Link rear suspension's rising-rate design can handle almost any terrain.
