American Handmade Fat Bikes

FALL 1985

RetroBIKE
WWW.RETROBIKE.CO.UK

"Durability, performance, and functional simplicity" is the FAT CITY design philosophy.

FAT CHANCEs are quick and agile. Our short wheel-base positions the rider's weight over the rear wheel, maximizing both uphill traction and acceleration. Our front-end geometry is nimble and responsive. The downhill control is solid.

Our double butted chrome-moly steel tubeset provides strength and stiffness. After welding, all FAT CHANCE frames are precision aligned on a granite surface plate, and all are protected with a chip-proof baked epoxy coating.

We are proud that in four short years the FAT CHANCE has become the top selling American handbuilt fat bike East of the Rockies.

Enjoy the ride.
