RRP £345.00

FUSION 120 — A British design for British conditions.

Using Fusion's unique Tange Bilateral Oversize Frame Tubing and Suretrac Fork System the 120 is made for riding in the most testing muddy terrain. Suntour's XCM Express componentry ensures swift, positive gear changing at all times, even under load. Fusion's oversize 11/4" headset and steerer ensure that you retain control at all times even on the fastest, roughest descents, while the low profile Fusion Maximum Reaction brakes give powerful controlled braking. The carefully selected Ritchey Quad 1.9" tyres are equally at home on the streets as they are churning through mud on the hills — fast and responsive.

Wherever you are — Fusion 120's stylish looks and powerful performance will take your breath away.
