What happens when an irresistible force meets an immovable object?

AVALANCHE

TOTAL
DOMINATION.

The all new G

XIZANG

To completely dominate your terrains and your competition, you need the right tools. The right vehicle and the muscle. GT leaves the muscle up to you.

Titanium; for the ultimate ride; when only the best will do. Stiffer than aluminum and lighter than steel. The impeccably handcrafted Xizang LE will remain unrivaled throughout the coming decade. Hand-picked componentry, of course. When you're ready to eliminate any vehicular excuses.

Like the natural force it's named for, the 1990 GT Avalanche attacks any trail, fireroad or mountain with thunderous ferocity. Meticulously engineered, the Tange Prestige/ MTB tubed frameset results in the ride of a lifetime. This race-ready sensation puts the

GT All Terra line.

it counts . . . the winner's podium.

Even if you don't race, a first place finish in included with the Avalanche's unique Snowstorm and Lunarscape paint scheme.

The classic GT Karakoram stands ready to propel you into a new era. This Shimano Deore LX equipped bike has been carefully designed with 16½" chainstays, 70° head and 73.5°

precision of Shimano Deore DX components with 32-spoke Araya RM-17 wheels and Ritchey Megabite tires where

The Dominant

seat angles.

A great bicycle should not be judged on engineering and components alone. The aesthetic appeal of the Karakoram is incomparable. The custom look of the innovative Purple Haze paint continues the precedent that has made the GT Karakoram a tradition.

KARAKORAM

Force in 1990.

Pick any path. The 1990 GT Tequesta delivers you in style. The captivating Nimbus painted chassis is outfitted with top-quality componentry from Sun-Tour, DiaCompe and SR. If blue is not you, pick the wild Fiesta or Gloss Black.

TEQUESTA

GT ALL TERRA

GT Bicycles, Inc.
17800 Gothard Street
Huntington Beach, CA 92647
(714) 841-1169

To get properly dirty you must be properly equipped.

You probably won't be tracking mud into a professional photo studio, but if tracking in a lot of good times is in your future, here's a few items to make life on the trail a bit more pleasant.

GT Instaflate — This CO2 powered life-saver allows you to regulate the air pressure being put into your tube.

GT Toe Clips and Straps — There's nothing worse than slippery feet. Cinch them down with the wide clearance of GT Toe Clips and reinforced nylon straps.

GT/AME anatomical grips — "Finally, a pair of fantastic OEM grips." Mountain Bike Action magazine, January, 1990.

GT All Terra Water Bottles — Quench your thirst quickly with either the 22 oz. or 28 oz. size with free-flowing spout.
