PERFORMANCE

Superior performance, extraordinary durability and weight efficiency ...Grafton Performance gave birth to the success of after market bicycle components. Today, Grafton remains peerless in a world wrought with anodized imitation. Regardless of the frame one starts with, bicycles are moving objects of mechanical cunning judged by the achievement gained through the sum of their parts.

Grafton Performance has built an outstanding reputation for bringing innovative design to cyclists of all disciplines. From Team Yeti's Downhill Aces to the Grundig World Cup achievements of Tinker Jaurez, and now elite triathletes like Paula Newby-Fraser, world class personal performance has teamed with Grafton Performance, to cross the finish line ahead of the competition.

SC-II

Johnny's jewels ... cantilevers become mechanical art.

Easiest single bolt adjustment. Sealed against the elements like no other brake. Lighter with pads than most brakes without pads. Oil or grease injection ports. Interchangeable pad compounds for dry, wet or muddy conditions. Never buy another brake pad — just replace it with new plugs. Complete brake pad assembly available separately as upgrade to any other brake.

Original Speed Controllers
.. or Mag Lites

Speed Controllers

Out performs, out looks, out of the way.

Superior braking power for one-finger grip. Straddle cable conveniently quick-releases at either arm. O-ring sealed front and rear for long lasting performance. Brake arms pivot reliably on brass bushings. Spring tension adjustment in each brake arm allows for a full range of lever feel. Low-profile design provides maximum heel clearance for seat stay configuration. Includes Grafton and Shimano style pad adjusters, and two pair of Dia-Compe pads.

Re-Entry Levers

One finger levers for one finger brakes.

Ultra-light and durable 7075 T-6 aluminum. Four position adjustable pivot point dramatically increases braking power and modulation. Separate perches available for RAPIDFIRE PLUS shifters.

Mountain.. Cross.. or Road

Speed Traps

Clipless performance without the weight.

Top and/or bottom clip-in configurations. Free-float rotational design saves knees. Low-profile aluminum cleat with replaceable inserts. Durable 7075 T-6 aluminum body and cage. Adjustable release tension. Ultra-light 6AL-4V titanium spindles.

Mountain.. Compact
.. Road ..or Tandem

Mountain.. or Road

Joy Stix

Performing art.

Ultra-light 7075 T-6 aluminum. Spider is integral to crank arm. 170, 172.5, 175, 177.5, and 180 mm lengths.

Speed Case

More seals, more miles...more speed.

Four seals per side keep dirt out, lubricants in. Titanium and stainless steel spindles available. Run packed with grease or bathed in oil. 3mm of adjustment per side. All spindle lengths available. Fits all threaded bottom bracket shells.

Shifter Perch

Freedom from bulky levers.

The Grafton Perch allows riders with integral Shimano shift and brake levers to detach the shift mechanism from stock levers while upgrading to Grafton Re-Entry Levers.

Dust Caps

Fitting finish.

Machined from 7075 T-6 aluminum, Grafton Dust Caps, available in all anodized and polished finishes, are the fitting finish to Grafton Joy Stix.

Available in brilliantly polished aluminum, black, or your choice of dazzling anodized colors.

Grafton Performance — Guaranteed For Life.
