DESIGN

Distinctive frame design features internal cable routing allowing ultra-clean and visually stunning 'stealth' looks.

CONSTRUCTION

Composite monocoque construction combined with HOTTA'S unique internal perimeter liner system (IPL), results in a frame of great strength, rigidity and light weight.

HOTTA

M.A.X

An advanced fully composite MTB design from

HOTTA – The Winning Constructor.

Extensively developed carbon-fibre monocoque utilising technology that draws on experience gained in the uncompromising world of Formula 1, where light weight and high strength requirements are critical.

The composite frame design ensures outstanding stiffness properties, necessary for quick power delivery and responsive handling – a must for a top level quality frame.

Good design is measured by overall excellence of form, function and attention to detail...

HOTTA frames have these qualities.
