Die-cast for precision performance.

- *Every frame is die-cast in just 40 milliseconds, at 650° C under 650 tonnes of pressure, in the world's largest hot chamber facility.*
- *The Kirk frame is the result of 10 years research and development by aerospace engineer Frank Kirk.*
- *Computer aided design has helped match the unique qualities of magnesium alloy to the demands of the cyclist.*
- *Precision die casting and computer controlled robotics ensure the perfect alignment of every frame.*
- *X-raying, and subsequent computer analysis of every frame casting, provide the assurance of the highest levels of quality control.*
- *A worldwide patent guarantees that Kirk will always remain the 'one and only.'*

Revolution A20

Designed to tackle those wild extremes with venom. Combining Shimano's latest Altus A20 groupset with a host of premium, upgrade features. Check out the spec and join the Kirk revolution.

Magnesium the facts.

- *Magnesium is the lightest structural metal known to man – one third lighter than aluminium.*
- *Kirk use only High Purity Magnesium Alloy for superior mechanical strength, excellent damping capacity and remarkable stiffness.*
- *The Magnesium Alloy qualities of a Kirk frame will not fatigue with age. It is immensely durable, highly resilient to impact damage and will not rust – even if the paintwork is chipped.*
- *Magnesium is the environmentally sound choice as only 0.01% of the Ocean's resources would be depleted if worldwide consumption quadrupled, and was used at this rate for a million years.*
- *Only one and a half cubic metres of sea water is needed to provide enough Magnesium for one Kirk frame.*
- *Frank Kirk's pioneering developments with Magnesium have received prestigious international design awards.*

Altus C10 groupset. Multi-Condition alloy cantilever brakes. 21-speed Dual SIS transmission.

Altus C10 Rapidfire STI gear shifters. Alloy brake levers.

Exage quick release alloy hubs. Alloy rims. Stainless steel spokes. Blackwall 2.0" tyres.

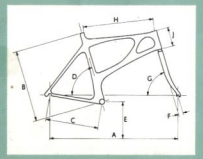

Vetta Foam saddle. Alloy pillar with quick release. Beartrap pedals.
