Mert Lawwill Designs Inc.

INTRODUCING THE LAWWILL LEADER

A new high-tech concept in front suspension from the fertile mind of suspension guru Mert Lawwill, designer of the Fisher RS-1 rear suspension.

Featuring:

2.5"-64mm -travel leading link design

Constant trail - trail remains constant throughout the full range of travel, giving consistent steering at all times

Cantilever brake or optional Hope Industries mechanical, 5 "disc brake model with progressive anti-dive

Fully adjustable air-sprung, oil damped Risse Racing shock

Aircraft 4130 chrome-moly 2024 T6 aluminum alloy construction

Weight 3.5

Steerer sizes 1", 1.125 ", 1.25"

Offset 1.5" 3.81cm

"What separates the Leader is the upward slant of the leading links and their patented uneven lengths, which forms a parallelogram. The upward orientation predisposes the front wheel to glide up and over obstacles rather than being driven backward, as is the case with downward angled linkages. This makes the Leader much more responsive and supple than similar looking designs. It provides about 2.5" of wheel travel, which along with its' ready response makes for the plushest, smoothest ride I've experienced from a suspension fork. Comfort aside, its' handling that makes this fork a standout. Most impressive is the way it tracks the ruts taken at an angle. Most forks work well when the wheel impacts something at about 90 degrees, but nothing I tried could match the Leader for precise control when hitting a depression, log, or curb at an acute angle."

John Kukoda, BICYCLING, June 1992

"Test riders said, 'The Lawwill fork made their Rock Shox tm feel like a rigid fork. We're talking plush!'"

MOUNTAIN BIKE ACTION, March 1992

Dealer price: $265 Suggested retail: $395
Maintenance Kit Dealer price : $20
Suggested Retail : $25
