SUPER SHORT

New MTB Drivetrain for 20” Wheels

pg. 15/17

Kids ride hard, and they need components that can keep up. Super Short is designed to exceed their expectations.
Yes, we added a shorter cage to our trail-proven ADVENT and Acolyte groups so that the rear derailleur would fit 20” wheels. But Super Short is so much more than that. Everything from our new Quick Trigger shifting platform to the updated 11-38T cassette range have been engineered to give smaller riders an unrivaled riding experience.

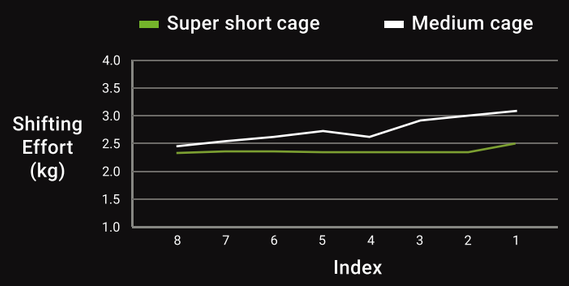

EASY TO REACH

Some people don't think kids can operate a trigger shifter. Those folks have never tried our new Quick Trigger shift levers. The pads rest closer to the handlebar, and the lever throw per shift is **43%** shorter than the competition. No shifter is more dialed for small hands.

LIGHTWEIGHT ACTUATION

By using a modified internal derailleur spring and shorter cage, shifting effort is reduced by up to **25%** while still retaining clutch force for chain retention. No need to worry about hand strength, whether child or adult.

CLIMBING MADE EASY

To work better with small wheels and keep the ground clearance high, we designed Super Short to work with an 11-38T cassette. When you pair that with a 20” wheels, you get a gear low enough to scale mountains.

MOUNTAIN

ADVENT X — Top of the line performance has never been this easy to own. Light weight, wide range, and dialed ergonomics all come together in a package with no proprietary standards. Everything about mountain biking should be this easy.

ADVENT — For everything from E-bike to all-mountain, the most durable 1x drivetrain on the market is designed to be ridden hard with no apologies.

ACOLYTE — With rock solid chain retention, intuitive shifting action, and enough gear range to climb a wall, you'll be free to focus on what's important: building your skills.

SUPER SHORT — Designed for real mountain biking on 20" wheels, this group features easy-to-shift ergonomics, trail-proven clutches, and enough cassette ranges to scale mountains. Kids can now ride harder than ever.

XCD — With features like repairable clutch and optimized cable path, XCD delivers range and accuracy in the toughest condition.

XLE11 XLE10 — By sharing key fetures with microSHIFT's top-end mountain bike groups, XLE brings high end performance to the middle of the pack.

MARVO LT MEZZO — Crafted with the same care as our high-end products, these components are designed to perform time and time again.

ADVENTX

1 x 10-Speed

Mountain biking isn't complicated - your drivetrain shouldn't be either. ADVENT X is our widest range and also lightest 1 x 10 MTB group.
