Whiskeytown Racer

Serious Fun

Proven Race Geometry

Calculate to win on the Whiskeytown Racer. Since the 1981 Whiskeytown Downhill, which the bike is named for, the Whiskeytown Racer has set the standard for geometry. Once considered radical, the 71°X 73° geometry has long since become industry standard. Tange Prestige light and sweetly maneuverable. Superb on the single track, with geometry that remains true.

The Whiskeytown Racer, a Radical Classic

New design for '95. We increased our Mono-Stay strut diameter for improved stiffness. Lighter than conventional twin seat stays. Attached to a larger diameter tube for more efficient braking. A Mountain Goat original others can only imitate.

No more fumbling through the old tool kit! Mountain Goat just made getting to your Allen Wrench easy, with a brand new Seat Clamp.

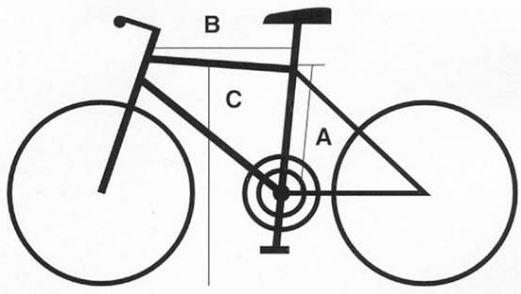

- Tange Prestige Mountain tubing for a lighter, resilient ride. Takes the punishment.
- **New for '95!** The Mountain Goat Seat Clamp incorporates your most important tool, the 5mm Allen Wrench. Great for quick adjustments.
- **New for '95!** Mountain Goat Drop-Outs feature compact, clean design. Light, strong and functional.
- Wide range of sizes, 12", 15", 17", 19", 21".
- Mountain Goat's own investment cast braze-ons continue to offer style and function.
- Famous 3-D cast goat head tube Mountain Goat badge. (Yes, we started the re-emergence of head badges.)
- The only frame we still offer in Mountain Goat green and orange team finish. We dare you! Also available in other outstanding Imron paint finishes, including Metallic Black, Blue, Red, Silver and White/Pearl. All with contrasting accents of shooting stars or comets.
- Top tubing cable routing on the center of top tube, not on the side where it can bite you. A standard Mountain Goat feature.
- 1" Steerer Tube requirement.

Measurements

A. **Frame size-seat tube length**
Measured from center of BB to center of seat tube/top tube intersection.

B. **Top tube length (effective level)**
Measured horizontally from head tube/top tube center-line junction to seat tube center line.

C. **Stand-over**
Measured from top of top tube at mid-point to ground.

Introducing the Joule, J=n*M

Top tube cable routing saves you from cuts and abrasions that can happen with traditional side routing.

More compact than other designs, our brand new Mountain Goat Drop-Outs are light and rack-compatible.

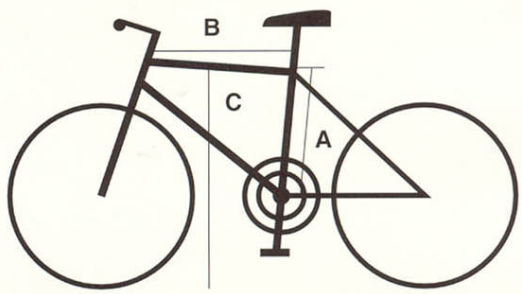

- Steel is Real. Takes advantage of Tange's oversized Prestige Ultimate Ultra Light tube set for a lighter, stiffer ride.
- Externally butted seat tube eliminates the seat collar and saves weight.
- Suspension specific geometry.
- Mountain Goat's own investment cast braze-ons continue to offer style and function.
- **New for '95!** The Mountain Goat Seat Clamp incorporates your most important tool, the 5mm Allen Wrench. Great for quick adjustments.
- **New for '95!** Mountain Goat Drop-Outs feature compact, clean design. Light, strong and functional.
- Top tubing cable routing on the center of top tube, not on the side where it can bite you. Standard Mountain Goat feature.
- Famous 3-D cast goat head tube Mountain Goat badge. (Yes, we started the re-emergence of head badges.)
- Decorative reinforced Head Tube Rings. The rings strengthen the head tube where the bearings are pressed in. Look for them on other bikes. Most manufacturers won't take the time.
- 1 1/8" Steerer Tube.
- Outstanding Imron paint finishes, including Metallic Black, Blue, Red, Silver and White/Pearl. All with contrasting accents of shooting stars or comets.

Route 66 for Quality Kicks.

The fork conveniently accommodates low rider packs. Also, note how Mountain Goat puts the cable routing on top of the top tube.

Mountain Goat goes a step further with decorative reinforced Head Tube Rings on all our steel frames. The rings reinforce the head tube where the bearings are pressed in. Look for them on other bikes. Most manufacturers won't take the time. Cast Goat Head, head badge standard on all Mountain Goats frames.

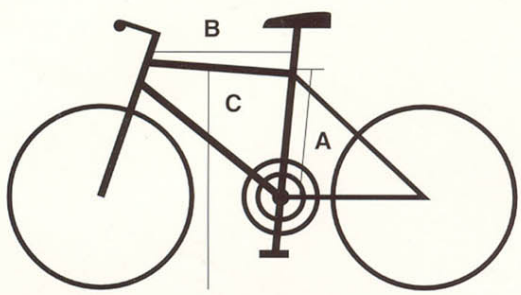

- Tange Mountain Prestige tubing, light but can take punishment.
- Moves with confidence on the pavement or in the dirt.
- Relaxed head angle and sturdy frame mean super stability, even when fully loaded with panniers and gear.
- Seat angle accommodates serious in-the-saddle climbing.
- Rigid fork with low rider mounts and fender eyes. Cantilever bosses front and rear as well as rack mounts on rear.
- Mountain Goat's own investment cast braze-ons continue to offer style and function.
- **New for '95!** The Mountain Goat Seat Clamp incorporates your most important tool, the 5mm Allen Wrench. Great for quick adjustments.
- **New for '95!** Mountain Goat Drop-Outs feature compact, clean design. Light, strong and functional.

Mudslinger

Let 'em Eat Mud

Leave the crowd behind with the Mudslinger.

Aggressive, quick and on-target, the Mudslinger's built to go further, move and maneuver more effortlessly, and stop on a dime. Lighter than light with Easton Program 7005 tubing and streamlined Towers of Power for strength. Great for single track, cross country and the downhill.

Serious Fun

Mountain Goat®
CYCLES INC.

P.O. Box 3923 ▪ Chico, California 95927 ▪ 916.342.4628 ▪ Fax 916.342.4647

Aggressive, Precise and Powerful to the Finish

Redesigned to be lighter and sleeker in appearance, Mountain Goat's Towers of Power are CNC'd from billet 7005 aluminum, machined for lightness and designed specifically to complement the Easton tubing.

The seatstay to seat tube Tower of Power strengthens the cable tower stop and eliminates rear brake flex.

The chainstay to bottom bracket Tower of Power reduces bottom bracket flex and stiffens the rear triangle, increasing overall frame rigidity and improving the energy transfer to the rear wheel. You can feel it the minute you start to pedal.

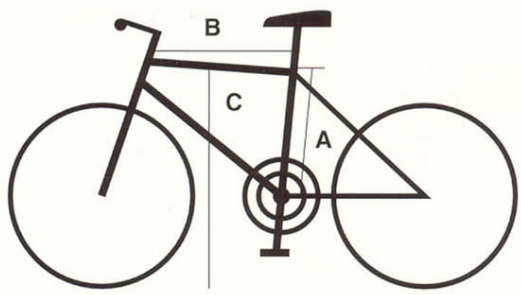

- **New for '95!** The infamous Towers of Power have been streamlined and lightened for another exclusive Mountain Goat design. Efficient power transfer and no frame flexing.
- Easton Program 7005 series aluminum tubing, used only by manufacturers looking for quality. The Mudslinger uses a special Mountain Goat blend of Easton tubing.
- Top tubing cable routing on the center of top tube, not on the side where it can bite you. Standard Mountain Goat feature.
- Suspension specific geometry.
- Famous 3-D cast goat head tube Mountain Goat badge. (Yes, we started the re-emergence of head badges.)
- **New for '95!** The Mountain Goat Seat Clamp incorporates your most important tool, the 5mm Allen Wrench. Great for quick adjustments.
- Outstanding Imron paint finishes, including Metallic Black, Blue, Red, Silver and White/Pearl. All with contrasting accents of shooting stars or comets.
