CYCLE PRODUCTS 2009

POLISPORT – General overview

Born in the end of the 1970's by the business mind of Pedro Araújo, Polisport was a company created when Mr. Araújo realized there was a gap between the need for replacement of plastic components and the response to that need. Taking notice of the void in that area, and realizing the need to obtain accessories from within the local market, Pedro Araújo set off to create in Portugal, an innovative company, dedicated to filling that gap.
In 1982, Polisport began the manufacturing of the first plastic parts, and today, is a worldwide famous company, occupying a place of prestige among its competitors.

Mission
Trying to anticipate and answer the needs of the cycling community, we have declared it our mission to create innovative accessories for bicycles, providing leisure and differentiation, while granting the safest performance possible.

Vision
In our everlasting search for excellence, we pursue the goal of being the leader in the area, which we hope to achieve through brand recognition. Hoping to secure our position of prestige, we use the know-how and experience gathered from more than 20 years of serving cyclists worldwide, to create some of the safest, most original and high-quality cycling products in the worldwide market.

Strategy
Our strategy is based on a continuous research, flexibility and close partnership with our customers, in order to guarantee professionals and enthusiasts the absolute best in bicycle accessories, which represent the highest levels of quality.

Innovation
Having learned the value of innovation, we make a strong bet in the fields of research and development, which constantly generate new ideas, materials, tools and productive processes.
Clear examples of the results of such bet, are the worldwide launchings of several of our innovative systems as QST (Quick Safety Turn), FF (For Frame) and RS (Reclinable System), all three specifically created for child seats; and technologies, such as IPD (Inmold Plastic Decals - a technology that fuses graphics onto plastic parts as an alternative to adhesive stickers), DGP (Durable Gloss Polypropylene - the 1st plastic composition for off-road that incorporates simultaneously maximum gloss and high resistance) and DI (Dual Injection - the simultaneous injection of 2 materials: polypropylene and rubber), launchings which raised the brand recognition, elevating it to a position of excellence among the cycling production all over the world.

Safety
From child seats to helmets, from water bottles to mudguards and from shin to elbow/knee protection, all of our accessories are produced and developed with the objective of providing maximum safety levels, thus, all of our products are strictly tested and approved in accordance with the most recent safety standards.

At Polisport, our business is innovation, quality and safety, because cycling is a passion of yours, and perfection, is a passion of ours.

Merchandising 66-67

To put your mind at ease when taking your child with you on various your bicycle rides, we have developed the perfect solution for carrying your child on most bicycle types.

Understanding the importance of protection, we have designed and produced a range of top quality child seats, using the most innovative systems created especially for them, such as Quick Safety Turn (QST), a new fitting system which allows an easy backward and forward positioning of the seat on the bicycle; Reclinable System (RS) to ensure comfort when your child is sleeping; and For Frame (FF), a type of holder with simplified mounting in any type of bike frames (round or oval).

Our ergonomic child seats are all built with safety and comfort as the primary goals, offering features as: adjustable safety harnesses that the child cannot unbuckle; foot protection; padded safety belts, for softer shoulder protection and full protection in case of heavy falls.

Very practical and simple, all of our UV resistant child seats are of easy assembling, most of them with no tools required.

Our innovative range of child seats, are tested and approved according to the strict safety standard EN 14344, raising the bar in quality, safety, ergonomics and design.

Whether in a competition or simply for leisure, safety in cycling should not be forgotten.

Polisport's complete range of helmets, are produced using high-level manufacturing technologies, such as in-mold and DGP, providing a product that is not only reliable and resistant, but is also comfortable.

Created for indoor and outdoor activities, our helmets are shaped and built with the objective of making them a lighter, ventilated, and most important of all, highly resistant protection.

With a choice between glue-on and in-mold, you will find in our complete range of top quality helmets, a type of product that was created as combination of protection and comfort, offering you a variety of features created to enhance your cycling activity, as are the reflective stickers, removable visor and easy lock system.

All of our models comply with the strict European standard EN 1078, because at Polisport, we worry about your safety.

Overview

In cycling, safety resides not only on the protection you wear, but also, the protection your bicycle wears.

Polisport's background in high level competition and the use of state-of-the-art technologies, such as Dual Injection of rubber and polypropylene, has given us the knowledge and precision to respond with accuracy to cyclist's needs.

For your protection against water, mud and debris, we have developed an answer for most bicyle types with our diverse line of mudguards, using the innovative clip-on system, to be applied in both the front and the rear of the bicycle.

Being a very accessible product, our mudguards are of very light weight, and very easy to mount, so that anyone can assemble it.

The result is high-performance, unbreakable and quick release mudguards, ready to face your track of choice.

In an intensive physical activity such as cycling, constant hydration is of utmost importance.

At Polisport we offer you a wide range of ergonomically designed thermal bottles, which comply with food and contact regulations, so that you can carry water with you wherever you go, and keep it at the temperature you desire, be it hot or cold.

Designed to be practical and easily maintainable, our water bottles are very light in weight, very easy to clean and refill and fit all standard bottle holders.

These bottles, which offer you a selection of accessories for you to choose from, come in an assortment of capacities that range from 300ml to 900ml.

Also, because we value variety, we give you the option to give your water bottle your personal touch, by choosing to add to them your customized printings.

Intense physical activity calls for intense protection.
That is why we have developed a series of technologically advanced protections for off road use.

Anatomically shaped and with easily adjustable straps, our chest protectors, knee/shin and elbow guards give you the protection you need, with a secure fit, while maintaining your natural movement flow.

Applying our expertise in the field of cycling, we have developed a type of protection that is light in weight, so that it doesn't restrict you; has directional venting, so that you are always cool; and that can be easily adjusted to the shape of your body, so that comfort is never an issue.

Most of our protections are manufactured in Durable Gloss Polypropylene (DGP), a technology used to guarantee you the highest resistant standards to impact, and a shiny look prepared to face an intense use.
