5TH DIMENSION SUSPENSION

'Words'

2.9lbs, 2" travel, titanium 6A1 4V, CNC machined, aerospace, MDF-66, CAD CAM, 2014-T6, 6082-T6, micro encapsulated, labyrinth sealed, 7075 MMC.

These are words.

Yes they describe materials and processes, but that is all they describe. No words can adequately describe the skills brought together to make these materials and processes into what you are about to see in this brochure:

Unquestionably the finest suspension fork available today.

Art
or
engineering?
you decide.

Pushing the envelope

This world of ours is constantly demanding bigger, better, faster, more. We at Quasar Racing have risen to this challenge, and by doing so have thrown down the gauntlet to the world of mountain bike suspension.

Our engineers mandate was absolute. Ignore trends, use the finest materials available, don't cut corners. Simply make the finest suspension fork possible and make it work year in year out with the absolute minimum maintainance, mud or no mud.

We know the best when we see it. Do you?

Race it, win it.

Quasar Racing has developed the definitive mountain bike suspension fork. Quasar Number One is exceptional by design and material choice, it gives you the confidence to ride in all conditions.

Quasar Racing is unique in offering an extensive range of easy to change shocks. One allen key and two minutes and you can fine tune the ride to suit your style and the conditions.

This fork was designed to involve you, the rider, from fitting to the finish line.

Quasar Racing assures you that we can offer no better product. Your comments will be valued by us all.

M.P. Hammond
Chairman, Managing Director, Engineer, Enthusiast.
