# MOUNTAIN

A Rhygin is not a me-too, conservative, middle-of-the-road mountain bike. It is built for riders who are ready to move to the next level and need a tool to get there. The geometry is aggressive, designed to quickly carve singletrack and climb explosively. Yet the frame still offers the smooth ride of steel. We've also adapted our frames from the ground up to work with the leading front suspension technology, so all components work together in perfect harmony.

The result is a bike that allows you to do things you never thought possible. The razor sharp handling lets you attack the mountain with greater speed, precision, and confidence. With increased confidence, you'll push yourself to ride harder, carve tighter, race faster. Which, in turn, creates even more confidence. It's a wonderful, never-ending cycle.

*Juke HS*

The Juke and Juke HS are built with Reynolds 853. Our team has won six New England Championships, the Eco-challenge and countless regional events with the Juke. In March of 1997 Christopher 'Spike' Ramsden finished his 16,000 ride from Alaska to Cape Horn (and into the Guinness record book) on one. The HS frame is built specifically for Cannondale's HeadShok fork which offers unequaled lateral stiffness and steering accuracy, and a plush 70mm of travel.

The Juke SS is built with Columbus Metax (stainless steel) tubing. The most significant advance in bicycle tubing in 40 years or so. We can build a lighter weight frame with the responsive ride you expect from steel, and a few benefits: No rust, no scratches, and far less impact on the environment. Custom sizing is no extra charge.

## MOUNTAIN GEOMETRY

| Size | XS | S | S/M | M | M/L | L | XL |
|---|---|---|---|---|---|---|---|
| Seat | 12.0 | 14.0 | 15.0 | 16.0 | 17.5 | 19.0 | 21.0 |
| Seat° | 74.0 | 73.0 | 72.5 | 72.5 | 72.5 | 72.0 | 72.0 |
| Top | 21.0 | 21.6 | 22.4 | 23.0 | 23.4 | 23.8 | 24.5 |
| Head° | 72.0 | 72.0 | 72.0 | 72.0 | 72.0 | 72.0 | 72.0 |
| CS | 41.9 | 41.9 | 41.9 | 41.9 | 41.9 | 41.9 | 41.9 |
| Drop | 4.0 | 4.0 | 4.0 | 4.0 | 4.0 | 3.7 | 3.5 |

*Juke HS Head Angle = 71.5*
