1. SARACEN CYCLES WARRANTY

Saracen Cycles Ltd warrants the replacement of original components of Saracen Mountain Bikes due to defects in material and/or workmanship according to the following conditions and limitations. The frame and fork are warranted for a period of 5 YEARS (in the case of suspension forks 1 year). The original components other than the frame and fork are warranted for a period of 1 YEAR (labour and transportation charges are not included). The warranty is limited to the original retail purchaser only and proof of purchase is required to validate the warranty.

This warranty does not cover damage or failure due to abuse, neglect, accident, improper assembly or maintenance, normal wear and tear or installation of parts or accessories not originally intended or incompatible with the bicycle as sold.

Saracen Cycles Ltd shall not be responsible for incidental or consequental damage or loss. The user assumes the risk of any and all personal injury or damage of the bicycle, or other losses if Saracen bicycles are used at anytime in any competitive event (including bicycle racing, dirt biking, freestyling or similar activities or training for such activities).

Claims must be made through an authorised Saracen dealer.

2. Saracen Cycles policy is one of continuous improvement therefore specifications may be changed, without prior notice.

3. Mountain Bikes although tough are not indestructable, excessively rough use may result in damage to your machine and yourself. Take care when riding your bike and have it serviced regularly at your Saracen dealer.

THE SARACEN PHILOSOPHY

From the early rumblings of Mountain Bike culture to the active and exciting scene of today, SARACEN have always pumped life into the forefront of British MTB design. To SARACEN, the attributes of innovation, style, quality and durability have not simply been marketing ploys to import from distant lands . . . they have been the guiding force behind company development philosophy.

SARACEN Mountain Bikes have, year after year, risen to and surpassed the expectations of even the most demanding of riders. Feedback from development riders, expeditions and customers is carefully evaluated and, where beneficial, incorporated in new design features. The result is that SARACEN have always been two steps ahead of their closest market competitors.

SARACEN assemble all bikes by hand in their Warwickshire workshops, using componentry chosen from the best manufacturers around the world. One skilled assembler looks after each bike from start to finish, with double quality control during assembly, certified by two signatures, with the frame number and builders' name stamped clearly on the quality assurance cards accompanying every bike leaving the factory.

The famous SARACEN epoxy paint finish is electrostatically applied and hard baked over a chromate rustproofing primer. Imaginative and characterful colour choices are complemented by computer generated typographics reflecting the personal identity of each machine.

All frames are built with a full complement of neat braze ons and slotted cable guides and assembled with top quality bottom bracket fittings . Attention to detail is the SARACEN hallmark.

The imagination and innovation built into the range will ensure that your choice of bike becomes not a choice between brand names but a choice between SARACENS.

SARACEN. MAKES MOLEHILLS OUT OF MOUNTAINS.

NEW INNOVATIONS FOR 1991

NEW INNOVATIONS FOR 1991

NEW INNOVATIONS FOR 1991

SARACEN are well known for their informed and practical approach to Mountain Bike design. Useful innovation is an inspired force in the world of Mountain Bikes, but many of the best ideas are hidden because the giants of the industry cannot easily incorporate new innovation into forward planned production lines. SARACEN have the advantage.

Having direct control of the bike building process means that SARACEN can, at short notice, take on the best of new technology and make available aspects of Mountain Bike design normally only associated with small custom builders.

In their desire to push forward the barriers of Mountain Bike design, SARACEN are now building into their machines features such as quad profile frame tubing, hydraulic brakes, elevated chainstays and hydraulic front suspension.

QUAD PROFILE TUBES make it possible to considerably stiffen an aluminium frame at the points most prone to high stress and flex without the penalty of weight increase. The tube profile ensures that rider energy is processed directly into forward motion.

HYDRAULIC BRAKES are simply the most reliable and predictable form of stopping power available. The sealed dual circuit hydraulic lines transmit smooth and remarkably sutble hand pressure to the braking surfaces, ensuring effortless operation in all riding conditions.

ELEVATED CHAINSTAYS are a feature aimed particularly at the competition standard rider. They provide for excellent mud and chain clearance and a shorter rear traingle for superb traction, particularly when climbing.

HYDRAULIC SUSPENSION will be used by the majority of medal winners in the 1991 World Mountain Bike Championships. The advantages gained by the hi tech Marzocchi forks are particularly obvious on long, fast descents, where rider fatigue can impair both speed and enjoyment. The damping qualities of these forks can be pump adjusted to suit every riders' needs.

The innovative theme continues with SARACENS' convertible range of bikes. Designed as rugged but quick street machines with off road capabilities, these are fast becoming the bikes for the committed cyclist who loves speed and efficiency, but identifies strongly with the freedom image of the open trail.

Saracen Cycles policy is one of continuous improvement, therefore specifications may be changed without prior no

SAHARA

THE SAHARA. A serious entry level machine with cromoly double butted main tubes, reinforced at stress points and equipped with a well assessed mix of Shimano 200 GS and 500 LX components and sealed Deore bottom bracket, Tioga tyres, comfort system saddle and SARACEN'S famous handbuilt quality all help to lift the SAHARA to a far higher level than its price suggests.

SARACEN

ADVANCED MTB'S FOR 1991

OFF-ROAD RANGE

There's five bikes in SARACEN'S range of Off-Road Mountain Bikes, from the SAHARA, a serious entry level machine, to the aluminium framed TREKKER HYDROTECH, a superb lightweight machine with hydraulic brakes and high quality componentry. Mountain Bikers take their recreation seriously. SARACEN have responded by producing a no-holds-barred range with plenty to offer both beginners and experienced riders.

COMPETITION RANGE

The art of status is not new to SARACEN. The competition Off-Road range of bikes combines the status of hi tech engineering and a choice of 7005 series heat treated aluminium or eliptically strengthened cromoly frame tubes with the art of superb graphics and lightweight race componentry.
There are four Competition bikes to choose from, each one alive with innovative features and character, from elevated chainstays to quad section tubes and hydraulic suspension.

CONVERTIBLE RANGE

Fast crossover bikes are slowly gaining a committed following. If you love touring, or can't quite decide whether your heart lies in the city or the country, you should great choice of tyres. With lighter tubing and "fast" geometry, you'll experience all the look seriously at SARACEN'S new concept. With 26" wheels, you'll always have a advantages of a road bike together with enough Mountain Bike features for occasional off road ventures.

Elliptical profile tubing. Unparalleled strength.

Hydraulic braking system. Minimum effort. Maximum power.

Elevated chainstays. Stiffer traction. Excellent mud and chain clearance.

OFF-ROAD

ANDES

THE ANDES. The first in the range with Shimano Deore components and the first with the famous SARACEN double eliptical tube profile for increased strength to the bottom bracket, seat tube and headtube areas of the frame. Thoughtful and practical design features such as the forward facing seat bolt, out of muds way, characterise the essence of a mid range bike with top range benefits.

TRAVERSE HYDROTECH

THE TRAVERSE HYDROTECH. Until now, it was unheard of to get a bike in this price bracket with such hi tech features. Magura hydraulic brakes are not cheap, and normally only appear on top custom bikes. SARACEN have not sacrificed any other features to fit them. They simply add prestige and efficiency to an already classy machine.

TREKKER HYDROTECH

THE TREKKER HYDROTECH. The first of the 7005 aluminium series . . . super oversize, light, strong and extremely nimble. Shimano Deore LX drive train and gear system. Super Max Drive forks and Magura hydraulic brakes boost the abilities of the long established and highly admired TREKKER.

CONQUEST COMPEION HYDROTECH

CONQUEST COMPETITION

THE CONQUEST COMPETITION HYDROTECH

Everyone has a dream bike. SARACEN have incorporated their own innovative design features with the best of new technology to build everything that's best into one machine.

The result . . . not just a top of the range bike, but a machine that stands out from the rest as a peak of excellence in advanced design.

The 7005 series heat treated aluminium frame incorporates quad profile tubes to improve tortional load resistance and increase rider power transference by reducing frame flex. Elevated chainstays improve mud and chain clearance and a shorter rear triangle results in vastly improved rear traction when climbing.

What goes up must come down. The Marzocchi hydraulic suspension front forks will soak up the bumps on the downward trail through their air and oil damping, individually pump adjusted to each riders needs . . . opening up all sorts of new descending possibilities . . . and you don't need to worry about stopping . . . Magura hydraulic dual circuit brakes are smooth, reliable and, above all, remarkably powerful due to the frictionless sealed fluid line between the subtle and easy hand movement of the levers and the precise alignment of the braking surfaces.

Competition componentry sets the theme throughout the CONQUEST, with Shimano Deore XT over bar thumbshifters (the choice of top racers), top tube cable routing, short cage rear gear mech, Selle San Marco Comp saddle, superlite handlebars and steer horns.

The CONQUEST is simply a no compromise bike.

TRAVERSE COMPETITION HYDROTECH

THE TRAVERSE COMPETITION HYDROTECH. The benefits of elevated chainstays are now well established among serious competition riders. Add to that Magura hydraulics, a competition wheel package, Shimano Deore DX drive train and gear system with over bar shifting and you've got a "ready to race" machine at a price that will make it a top seller.

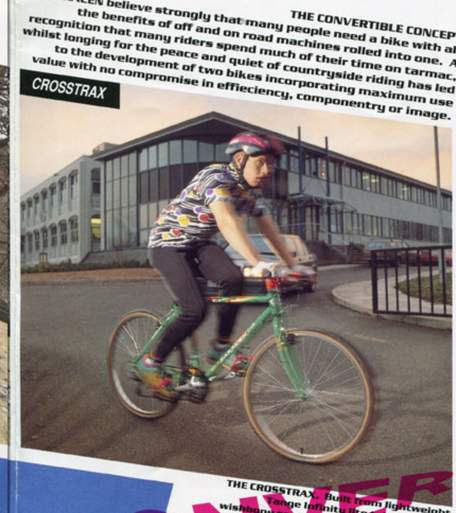

KILI FLYER COMPETITION HYDROTECH

THE KILIFLYER COMPETITION HYDROTECH. Moving up in the competitive field, the Kilifyer is the top cromoly bike in the range. With elliptically strengthened Tange Superlite tubing, elevated chainstays, Magura hydraulic Deore LX drive train and gear system, you have all the benefits of race proven componentry with the added design features of SARACEN'S individuality.

.. Featuring aluminium quad profile tubes for maximum weight saving and strength characteristics, elevated chainstays for superb climbing traction and black chromed switchblade aluminium crown forks for precise front end handling. Add to that a full competition componentry system, black wall tyres, steerhorns, leather comfort system gel saddle and Magura hydraulic braking system and you've got a bike that exceeds the standards of top competition riders.

TREKKER COMPETITION HYDROTECH

CROSSTRAX

THE CROSSTRAX. Built from lightweight Tange Infinity tubing, with a wishbone seat stay, a thoughtful mix of quality Shimano componentry, steeper frame angles for faster road and trail riding and Tioga City Slicker tyres. A quick and simple change of tyres creates amazingly effective off road capabilities.

FASTRAX

THE FASTRAX. Super sleek wishbone style frame with Reynolds 531 main frame tubes. A superb mix of FASTRAX specific components including close ratio Suntour XC gears, Avocet Cross tyres, Comfort System gel saddle and a host of features incorporating the practical innovations of modern off road, on road and touring bikes. A true convertible.

Quad profile tubing. Super stiff. Energy efficient.

Suspension forks. Smooth ride. Fast descending.

Steer Horns. For cruising and climbing.
