NEW FOR 2010

Unique hinge dfront entry allows rider to put the unit on without detaching the shoulder from the chest plate

SIXSIXONEDROID

In our constant pursuit of perfection and innovation, SIXSIXONE introduces the Droid. The worlds only patent pending neck support with integrated hard shell armor. Maximum movement combined with ultimate support is what the Droid is all about. Our unique patent pending system allows forces to be dispersed over a larger area thus moving the force off of the collar bone and cervical spine area.

- Injection molded polycarbonate front and back panels.
- Reduces neck compression and neck extension related injuries.
- Provides excellent coverage over the entire unit in the event of an impact.
- Forces are dispersed over a larger area in the event of a crash without unwanted pressure to collar bone and spine.
- Adjustable EZ-entry neck halo allows rider movement yet prevents support from hyperextension.
- Neck halo is fully adjustable to fine tune fit to different rider size and comfort
- Back panel protects without affecting freedom of movement with molded flex hinges.
- Unique hinged front entry allows rider to put the unit on without detaching the shoulder from the chest plate.
- The Droid uses a slight weight molded EVA pad s for added protection and performance.
- Fully vented front and rear panels have Bio-foam padding for maximum comfort.
- Patent Pending.

One Size: Height 5'6" - 6'6", Weight 140 -220 lbs.

FENIXhelmets

Performance, function, and style have never been more abundant than in the brand new, high performance Fenix helmet. With features like the Kevlar/Carbon fiber/Fiberglass shell, three large external intakes, and an extremely protective EPS liner that channels airlike an Indy car, this helmet will satisfy the most demanding riders. Six different colorways will give you all the options you'll need to be an individual, so go ahead... Dare to be different.

Exceeds Snell M2005, US DOT, AU, and CE standards

- Innovative wide goggle port for better goggle-to-face sealing and greater peripheral vision.
- One-piece molded rubber bottom edge beading.
- Three external plastic intake vents combined with internal EPS air channels allow maximum airflow.
- Stylish, large mouth vent allows for better air intake and increased ventilation.
- Wider, longer chin bar for increased impact protection, safety and comfort.
- Removable, washable Suvair comfort liner, cheek pads, and strap liners.
- Molded rubber eye port channels air to the forehead.
- Kevlar/Carbon fiber/Fiberglass composite shell.
- Unique, soft molded rubber emblem is rugged and provides protection & style.
- Aluminum visor bolts with stylized plastic washers.
- New EPS foam liner for greater protection, increased airflow and reduced weight.

NEW FOR 2010

FLIGHTIIhelmets

The style you recognize... The price you don't!
Introducing the SIXSIXONE Flight II helmet. We kept the same great styling from the Flight, but dropped the price down to a more affordable level. With stunning graphics, updated fit for greater comfort, & Snell, D.O.T., &ECE 22 ratings, the Flight II wins on every level. Are you ready to do the same?

- Adjustable visor with aluminum side visor screws.
- EPS foam liner conforms to your shape for superior fit.
- Lightweight injection molded thermoplastic resin polycarbonate shell.
- Inner air channels & vents create airflow to keep you cool & remove moisture.
- Nylex comfort liner & cheek pads for moisture controlled performance.
- Superior fit liner is removable, & washable.

AVAILABLE SPRING 2010
