Mountain Bikes

StumpJumper

StumpJumper M2 FS Comp

This StumpJumper has our M2 pro-fit skeleton, a metal matrix frame material that's incredibly light, comfortably stiff, and stronger than aluminum. And thanks to FutureShock-Tuning, the new RockShox Judy fork fits the bike as well as your aggressive style. Purple

StumpJumper M2 FS

Two of cycling's all-time biggest innovations—our M2 metal matrix frame and the RockShox Mag 21 adjustable hydraulic suspension together in one powerful bike. And the M2 frame's got that smooth-riding, FS-Tuned pro-fit geometry too. Black.

StumpJumper M2

The M2 material was first used for satellites moving 25,000 mph. This StumpJumper and its pro-fit frame will get you closer to that speed than you are now. FS-Tuning means you can safely upgrade to front shocks. Blue or Red.

Specialized Bicycle Components, Inc.

StumpJumper

StumpJumper

The classic trim, tough, and fast StumpJumper racer now has pro-fit frame geometry. You'll get a lighter, more durable and more responsive chromoly racing bike. And FS-Tuning lets you feel safe and secure about a future upgrade to front suspension. Silver Blue or Dark Blue.

StumpJumper FSR

This is the only fully-active, fully-independent suspension racing bike with four-bar linkage. The FSR's design eliminates the pedaling influence and braking influence problems of other systems. You'll experience better traction, better braking, more control, more comfort. RockShox Mag 21 in front; Fox Racing hydraulic shock/damper unit in back. Silver Grey.

StumpJumper FS

The classic StumpJumper flies over stumps, but add the RockShox Mag 21 suspension fork and you'll have the traction to fly on the ground. Its lightweight suspension-ready Prestige frameset features our race-proven pro-fit racing geometry. Champagne.

RockHopper

RockHopper Comp A1 FS

Our new A1 aluminum frame with pro-fit geometry is light and agile, but not too stiff. FS-Tuning means the RockShox Quadra 5 fork is an integral part of the frame, giving you extra traction, control, and comfort. Blue Satin.

RockHopper Comp A1

For power efficiency, it's stiffer than a new pair of jeans; for comfort, it feels like an old pair. That's our own A1 aluminum frame combined with our new pro-fit geometry: a ride that fits you (instead of the other way around). Silver.

RockHopper Ultra

Some people get a great new high-performance car and can't wait to make it even better. We applied this reasoning to the RockHopper and created the "pre-improved" Ultra. It has the same RockHopper super-responsive DirectDrive Light chromoly frameset and pro-fit geometry, but with even higher performance components. Aqua Satin or Red Satin.

Specialized Bicycle Components, Inc.

RockHopper

RockHopper

If you want to get an aggressive start in mountain biking, look into a RockHopper. It's just 26 pounds, thanks to our exclusive DirectDrive Light chromoly frame and new pro-fit geometry. The RockHopper is a performance bike that has years of experience—whether or not you do. Bronze Satin or Team Red.

HardRock

HardRock FS

tted DirectDrive Custom chromoly steel frame with FutureShock geometry for its SR DuoTrack 7005 spring/elastomer suspension. This fork delivers more traction and power, but it also absorbs shocks so you don't have to. Dark Green.

HardRock Ultra GX

This is one of those bikes that does everything and goes anywhere. It's gritty enough for rough trails, comfortable enough for day-long rides, and well-suited to street use. Full chromoly frameset and a resilient DirectDrive fork. Black Cherry.

HardRock GX7

An incredibly solid, very comfortable ride—thanks to race-tested, DirectDrive Custom-butted chromoly seat tube, pro-fit comfort geometry, and ProLong saddle. As comfortable for upright street riding as it is for mountain climbing. Red.

Specialized Bicycle Components, Inc.

HardRock

HardRock Sport GX

Sure, you can ride this bike in the street (quite comfortably, we might add), but feel free to enjoy it in the dirt, too. DirectDrive custom-butted chromoly frameset can out-tough just about anyone. And although the ride isn't any tougher, the Sport GX model is a little racier. Silver Metallic.
