THE KOGEE SPINNER TIRE SEALANT

The Kogee Spinner Tire Sealant, the new solution to seal most punctures, stop slow leaks, and virtually eliminate flats. Ride your bike, enjoy your trip, win competition...you don't need to worry anymore about flat tires, KSTS and his auto-repair functions are here for you.

Inject KSTS liquid into tire and rotate it, the KSTS liquid will evenly into the tire (or inner tube). If accidentally the tire is punctured, KSTS liquid will seal off any hole and so avoid any leak. You are safe and you can keep riding and don't even have to stop to repair.

KSTS can be used on MTB, folding bike and trekking bike, for tubeless tires or regular tube type tires.

TIRE SEALANT is a non-toxic material, tested by SGS, reports CC/2012/801124

Precaution : Do not use, store or freeze the KSTS under -40 degrees C

KSTS : is guaranteed for two years and made in Taiwan.
