OUR COMMITMENT

At Velo, we have long taken seriously issues related to the protection of the world's environments and the production of safe, people-friendly products. As part of the cycling community – which has its own long-standing and widely-recognized connection with environmental awareness and sustainability – we are always on the look out for opportunities that allow us to make a more proactive impact.

Over this past year we have furthered our investments in advanced equipment and production processes. These investments have contributed not only to a reduction in production waste and an increase in post-production recycling, they have also, and most importantly, advanced our abilities to introduce a variety of new products featuring safe, eco-friendly materials.

Our extensive knowledge of materials and components and our ready-access to worldwide environmental and safety regulations ensures that Velo products stay ahead of the curve, and it also means that Velo customers have access to much needed assistance in navigating rapidly changing regulations and requirements.

From our earliest years Velo has made strict adherence to environmental standards and product safety regulations an integral part of our corporate values. Our commitment to these issues is unwavering. Our customers and partners can always expect the best possible products from Velo.

Yours Sincerely,
Stella Yu

NEW FOR 2010

Velo remains at the forefront of bicycle component technology through continuous investment in innovative technology platforms, new material sourcing and advanced production processes. The se R&D efforts allow Velo to stay on top of industry trends, and, at the same time, remain responsive to customers' individual demands. For 2010, Velo introduces an array of exciting innovations designed to provide even greater choice.

ACCESSORIES
vMount™

Materials
TRIBENE

Velo's Tribene™ grip material takes grips performance to the next level. Tribene blocks UV rays that cause regular grips to soften or to become excessively tacky. This not only improves grip comfort, it also extends the life of the grip.

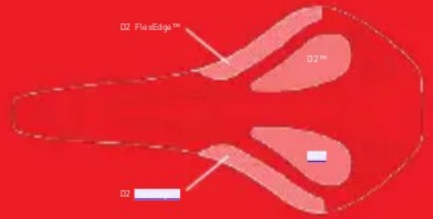

Materials
DURACORK

Duracork™ delivers the natural feel of cork with the durability of a traditional rubber grip. No more cork grips that dry out or break apart. Duracork also offers the same light weight as traditonal cork grips.

Technologies
D2 FLEXEDGE

With D2 FlexEdge™, Velo's patented D2 technology is applied to the area of the saddle that comes in contact with the inner thighs, delivering targeted flexibility in the saddle base for added pedaling comfort.

Saddles
COMPETITON SADDLES

Velo introduces two new competition-oriented platforms further extending Velo's competition saddle offerings. Features include race styling, optional Carbon Rails, ultra-lightweight construction, and more.

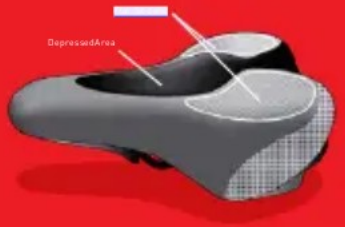

Saddles
SPORT SADDLES

Velo introduces two new sport-oriented platforms further extending Velo's line of sport saddles. Features include performance styling, lightweight construction, and integrated vMount System.

Saddles
Proportion SADDLES

For 2010, Velo introduces a series of anatomically-designed saddles that includes Junior, Women's, City, Mountain, Performance and Road Racing models. Main features include a flat sit-zone and Depressed Area for reduced contact between the saddle and rider's pelvis.

Grips

COMBIES

Combies™ are an innovative combination of grip and handlebar tape, that bring the comfort and the unique touch of handlebar tape to any straight-bar bicycle.

Tapes

COTTON

Not all handlebar covers are created equal. For 2010, Velo introduces an all-natural cotton handlebar tape that delivers an all natural feel that absorbs sweat and is washable.

Accessories

vMOUNT

Velo's vMount™ system allows cyclists to easily attach a tool bag or a water bracket to the back of their saddle. For 2010, Velo introduces a host of new saddle platforms that feature the integrated vMount™ technology.

MADE -TO- ORDER

THE RIGHT SADDLE FOR YOUR RIDE.

Velo offers an extensive range of saddle platforms that can be combined with an almost infinite number of covers, finishing techniques, and component options. If you don't find the perfect saddle in this catalog, let us know and we will help create the right saddle for your ride.

ALL THE GRIPS AND TAPES IN THE CYCLING SPECTRUM.

Velo offers the world's most comprehensive choice of handlebar tapes and an impressive selection of grips, both available in a plethora of materials, compounds, and finishes. If don't see the perfect grip or bar tape for your newest design in this catalog, let us know and we will help you make it.

2010 Product Short List

COMPETITION

2010 Product Short List

SADDLES COVERS

For 2010, Velo is pleased to offer the same extensive range of covers from previous years. In total 13 saddle covers are featured — a short list representing both our most popular models. As always, each model presented can be custom modified to meet any design requirements. **Use the table below to determine the appropriate cover size:**

SADDLE DIMENSION S(mm, L x W)	PRODUCT NUMBER
244-269 x 254-279	VLC __0
254-280 x 178-203	VLC __1
249-274 x 140-165	VLC __2
229-254 x 216-241	VLC __3
203-229 x 198-224	VLC __4
345-355 x 305-315	VLC __5
205-240 x 150-180	VLC __6

For Example: VLC 211 fits saddles with dimensions of 254-280 x 178-203mm

Material Options: Lycra/Neoprene, PU, Activated Charcoal
