

VELO
feels right

2011 Dealer Catalogue

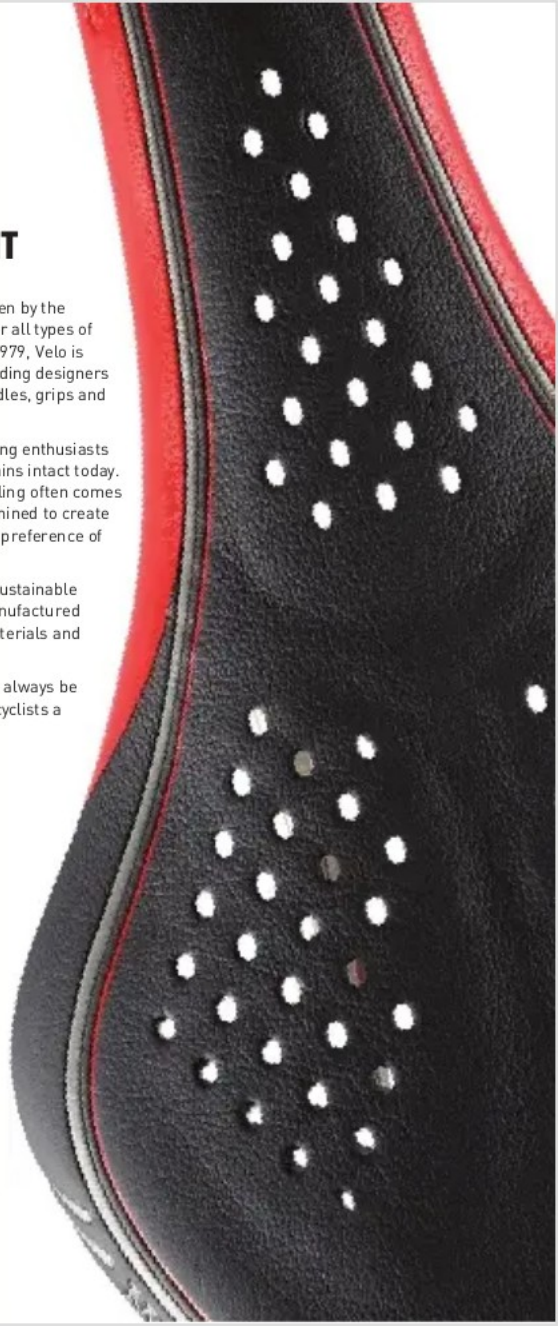

VELO FEELS RIGHT

Velo was started by a woman driven by the vision to create perfect saddles for all types of cyclists. Founded by Stella Yu in 1979, Velo is proud to be one of the world's leading designers and manufacturers of quality saddles, grips and handlebar tapes.

Velo's mission to support all cycling enthusiasts who value a healthy lifestyle remains intact today. Recognizing that comfortable cycling often comes down to the saddle, Velo is determined to create products, which suit the personal preference of every single rider.

Being especially committed to a sustainable environment, all products are manufactured with environmentally certified materials and processes.

For our customers cycling should always be fun and for more than 15 million cyclists a year Velo feels just right!

Velo's features and technologies.

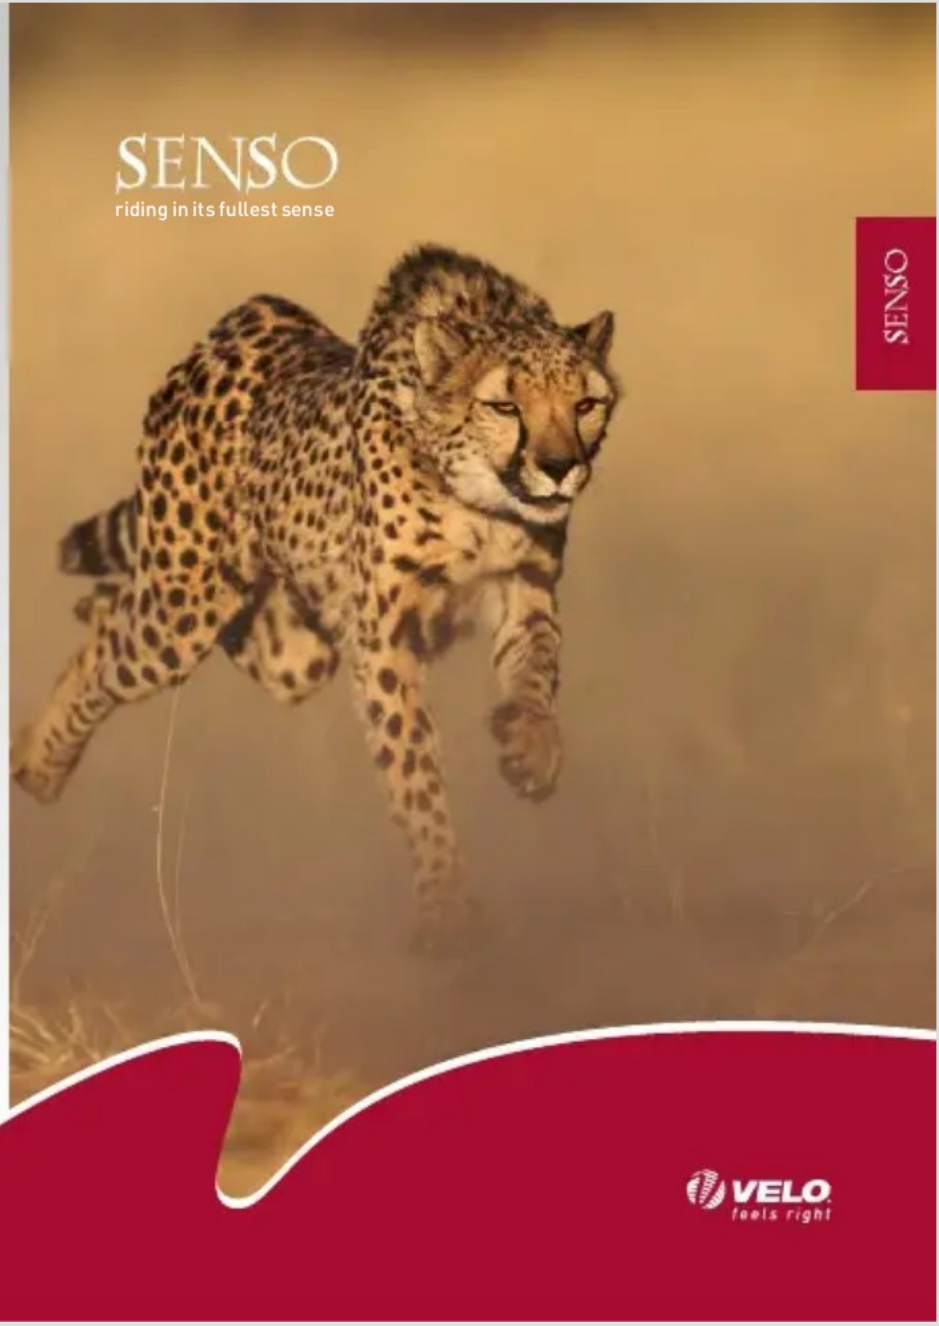

TECHNOLOGIES INSPIRED BY NATURE

The beauty of technologies inspired by nature – Drawing ideas from nature's ingenuity and manufactured in an environmentally responsible manner, the Senso line provides the highest quality saddles designed to deliver optimized performance and riding comfort. Senso takes technology, quality and comfort to a whole new level.

Whether it's a cheetah's incredible jumping capacity or a penguin's remarkable adaptation to extreme weather conditions, Mother Nature is the perfect source of inspiration for our saddle technologies. Senso saddles encompass a wide range of advanced technologies developed by Velo such as the Titanium Rail, O-Zone Cooling System, Cross Bow Suspension and Honeycomb Flexing Base. Senso offers a variety of gender specific saddles designed especially for competition, performance, recreation and BMX riding styles.

Enjoy advanced solutions modeled on nature's designs and experience the real beauty of cycling with the sensation of a Senso saddle.

Designed for comfort and performance

Senso saddles feature unique and valuable technologies developed to maximize performance and comfort for your specific riding style, body shape and seating position.

SENSO

Base Systems

Honeycomb Flexing Base

The openings within the base provide a perfect balance between firmness and flexibility.

Model No.: **4142**

Rubber Architecture Base

The base has integrated rubber material to strengthen its shock absorption and enhance comfort.

Model No.: **1200**

Double Density Base

The base is made of materials with two densities, the lighter one consisting of soft inserts. This technology combines to provide maximum shock suspension and firmness, which guarantees a comfortable riding experience.

Model No.: **3126**

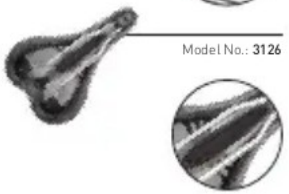

Cooling System

O-Zone Cooling System

The opening in the heart of the saddle relieves pressure on the body's most sensitive area and provides cool air flow while riding.

Model No.: **4102**

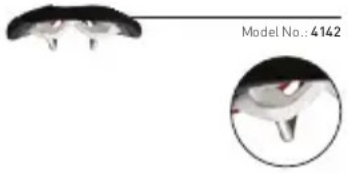

Model No.: **3126**

Suspension Systems

Cross Bow Suspension

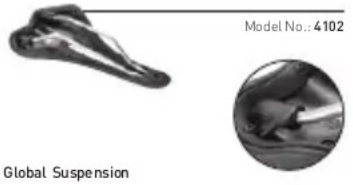

Two rails act as independent pillars to dissipate shocks more effectively.

Model No.: **4142**

ArcTech Suspension

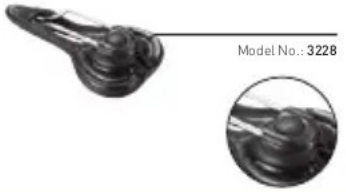

The patented technology provides superior support, as it enables the body to adjust directly to the current sitting position. This technology not only results in additional shock absorption but further improves flexibility.

Model No.: **4102**

Global Suspension

The uniquely developed air suspension system effectively reduces impacts on the hip and allows the body to easily tilt left and right, enabling the cyclist to turn more comfortably.

Model No.: **3228**

Rail Systems

Chromoly Rail

Stronger than conventional steel, Velo incorporates chrome to create a lighter and more durable saddle.

Model No.: **4102**

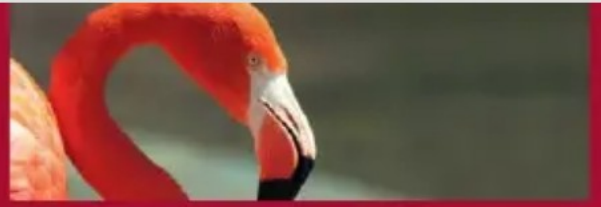

Titanium Rail

The firm, yet flexible and light rail provides stability and adaptability at the same time.

Model No.: **4142**

Plush

Experience comfort

Comfort **you can't live without**

When it comes to comfort, Plush is always the first choice - no matter what your riding style or preference may be. Simply immerse yourself in Plush's world of extraordinary comfort and it will soon become a vital part of your daily life, and so will cycling. Experience the benefits of a more active lifestyle and enjoy the maximum satisfaction of riding a Plush saddle!

The Plush series offers the perfect saddle for everyone. Urban and entry-level cyclists especially need a high quality saddle they can rely on. Plush saddles are engineered to meet a rider's preferred riding position – Relaxed, Inclined and Aero – and designed to meet the particular needs of recreational cyclists, who require a comfortable saddle in order to enjoy cycling.

Ride a Plush saddle to experience comfort you can't live without!

Relaxed

The comfortable solution for casual cyclists.

Suitable for recreational cyclists who like to ride in a relaxed position and want to fully experience the joy of riding. Velo has designed a series of technologically advanced saddles, able to allocate the body's weight and absorb shocks. These saddles simply define comfort.

Inclined

The first choice for active cyclists.

Cyclists looking for the perfect balance between comfort and performance have finally found their saddle. Velo's optimized design enables cycling enthusiasts to allocate their weight onto the legs, arms and partially the rear, making a forward-leading riding position a comfortable experience.

Aero

Discover the champion within you!

For competitive cyclists, whose bodies demand an aerodynamic riding position but don't like to compromise on comfort. As the upper body's leaning forward, added pressure is placed on the legs and rear, making a comfortable saddle all the more indispensable. A thin, streamlined Plush saddle will help you compete comfortably at the highest level!

Getting a comfortable grip goes a long way

Attune grips are developed for cyclists who need to maintain a firm and comfortable grip during longer rides. Velo's Attune grips are specifically designed to adapt to the unique anatomy of a cyclist's riding and gripping position. With a wide range of advanced technologies and non-slip materials, Attune grips offer a strong yet comfortable hold, optimizing control over the bicycle and enabling cyclists to master any challenge!

VELO FEATURES AND TECHNOLOGIES GUIDE

3D Stitching

Representing superior strength and high quality craftsmanship

Advanced Material

This material is developed to last and endure the most demanding challenges

Anatomic Cut

The saddle is specifically tailored to the cyclists body, providing the perfect conditions to ride comfortably at high speed

Anti Slip

The uniquely designed material creates a perfect bond with your hands and other body surfaces all ahead

Anti Slip

Featuring a continuous cradle design to provide superior hold

ArcTech Suspension

This patented technology provides superior support, additional shock absorption and improved flexibility

Bag + Lights

A detachable bag made of a unique 3M reflective material allows the storage of personal belongings and accesses a safe ride for the cyclist. The integrated LED light comes with three setting, beside

Center Channel

The dented area is specifically designed to relieve pressure on the rear

Charcoal Material

The fashionable Charcoal Material is treated to protect against odors. The activ-dry function enhances stability and guarantees optimum weather ensure.

Classic Look

Provides a classic look and assures a perfect grip

Coil Spring

Two coil springs attached to the rolling provide superior shock absorption

Comfort

The saddles are specifically designed to support the rear and reduces pressure

Cork Inserts

This material combines a natural touch with the most resistant characteristics of cork

Cover

Superior durability is guaranteed through the seamless and water-resistant cover

Cr-Mo Rail

Stronger than conventional steel, Velo incorporates chrome to create a lighter and more durable saddle

Cross Bow Suspension

Two coils act as independent pillows to dissipate shock waves effectively

Curved Shape

Following the anatomical shape of the hand, the leather grips ensure ease comfort

D2 Material

The shock absorbing microfiber material protects your hands and assures an optimal riding experience

Dense Foam

The high density foam padding is particularly light with maximum absorption characteristics

Diamond

The non-slip surface enhances the cyclists grip when riding off road

Double Density Base

The base is made of materials with two densities, the lighter one connecting all rails to the saddle. This technology combines to provide maximum shock suspension and firmness, which guarantees a comfortable riding experience

Double Pass

With their concentrated shape, grips can be easily attached to any other rails

Durocork

Provides the cyclist with the natural feel and lightness of cork while maximizing durability

Easy Slide

The integrated, water-resistant storage compartment allows for a quick and safe storage of keys, cell phones, tools and other items

Easy Swap

Topeak can be easily replaced by any of many fashionable colors available

Easy to attach

Simply tighten and go!

Easy to use

Loose the saddle and then tighten the cord to keep the saddle in place

Elastomer Suspension

The suspension system absorbs unpleasant shock, while the steel rails provide the necessary stability and firmness

G1 Lock

This unique mounting system and set of rails allows adjustments to the position of the grips possible

G2 Lock

Provides the cyclist with the utmost security. Its built to power forward on top to maximize the effectiveness of the feel

Gel Material

Adjusting to the pressure of the hands, the gel inserts optimize the cyclist's grip on the bar handle and provide superior comfort

Geltech

Gel inserts are three times more supportive than conventional foam inserts. They not only absorb shock well, but provide comfort to the sensitive sit bone area as well

Global Suspension

This uniquely designed system effectively reduces impacts on the hip and allows the body to easily tilt left and right, enabling the cyclist to turn more comfortably

Health Design

The center of the saddle features a dented area to improve body movement and to allow a constant air flow

High Density

Prolongs the grips life cycle and maximizes the cyclist's control over the bicycle

Honeycomb Base

The openings within the base provide a perfect balance between firmness and flexibility

Honeycomb Gel

The openings within the base provide a perfect balance between firmness and flexibility

Kevlar ™

Featuring tough Kevlar® threads on the sides of the saddle for extra strength and durability

LED Light

The integrated LED light comes with three interchangeable lenses. Pure white color

Memory Foam

Memory Foam perfectly adapts the seat to your body, guarantees a maximum comfort and maximizes shock points to sensitive areas

Micro Holes

The openings guarantee a firm hold and surely improve cyclists' performances

Microfiber

The natural feel that lasts longer. This microfiber cover allows for perfect temperature regulation

O-Zone

The opening in the heart of the saddle relieves pressure on the body's most sensitive area and provides cool air flow while riding

Panini

Integrated outlets within the gel cover allow for a economical air circulation in the sit bone area

Pivotal Mount

The patented mount reduces the lid ahead of time rails and allows for adjustable riding positions

Power Grip

Velo's advanced bar end improves accuracy naturally, enabling the cyclist to choose between five different gripping positions in the area the additional power grip produced for recreational riders

Pro Portion

The flat Silo-Cross and the dented area create bare saddle contact

Rubber Base

The base has integrated rubber material to strengthen its shock absorption and enhance comfort

Shallow Shape

The shallow shape allows for better hip movement and improved riding comfort

Silicon Gel

This Velo patented technology helps these grips round corner pressure, heat, and acts, water and wear much

Slip Protection

The reliable flange design supports children's hands to keep a firm grip while riding

Sport Design

The athletic combination of Sauna Sport 001 saddle and bar thanks top favorite among performance saddles

Titanium Rail

The forward flexible and light rail provides stability and adaptability at the same time.

Tribene Material

Velo's tribene material tail an grip performance to the next level. Effecting 3 ways, the grips keep their original shape and guarantee durability.

Two Tone

The soft-touch coating comes in two stylish shades

Unique Shape

The ideal design enhances cycling performance and overall leg movement

Uphill Grip

Velo's advanced bar end improves accuracy naturally, enabling the cyclist to choose between five different gripping positions in the area the additional grip available for uphill rides

Ventilation

The holes in the gel inserts ensure optimal ventilation and reduce the risk of slipping

vMount

Easy to attach accessories

Webspring Comfort

Three springs supporting the center of the saddle, which distributes the weight to ensure comfort on long rides

X-tra Protection

An additional rear protects the seat when the kid is left on the rails or bed
