MATERIALS

1. Tribene™
2. Duracork™
3. Pruven™
4. Fragrant Grips

TRIBENE

Velo's Tribene™ grip material takes grips performance to the next level. Tribene blocks UV rays that cause regular grips to soften or to become excessively tacky. This not only improves grip comfort, it also extends the life of the grip.

DURACORK

Duracork™ delivers the natural feel of cork with the durability. No more cork grips that dry out or break apart.

PRUVEN

Pruven™ offers the latest material advancement for the construction of comfortable and long-wearing. New and innovative technology also makes the Pruven™ feel softer.

FRAGRANT GRIPS

Beautiful scented grips that smell like a breath of fresh air. From fruit to candy fragrances.

GRIPS

For 2011, Velo is pleased to offer the same extensive range of products from previous years, as well as some notable add itional. Velo's entire line of grips, handle bar tape and related accessories is featured. Choose from a wide variety of materials, and of course colors options and designs that are virtually endless. Use the chart on the right to determine the available options:

- DD Double Density
- TD Triple Density
- QD Quad Density
- VGL Superlight VGL Material
- OS One Side Locking System
- TS Two Sided Locking System
- AD Anatomically Designed
- MC Multiple Color Options
- LW Light Weight
- AN Natural Material
- 1G 1st Generation
- 2G 2st Generation

INNOVATIVE

VLG 1027D2 (LIGHT)

NEW ITEM

- DD Double Density
- Key Point: Tribone™
- Other Features: Use External Battery

L: 134 mm

Safety Indicator Light
Velo introduces a new safety innovation to make cycling safer.
Push the button once and the bright LED indicator flashes for 15 seconds.
Push it twice and the light switches off.
The light' sangled smart design means it can be seen from more angles.

VLG 1027D2 - Light On

VLG 1027D2 - Light Off

VLG 1075AD2 (Bell)

NEW ITEM

- DD Double Density
- Key Point: Tribone™
- Other Features: Use External Battery

L: 130 mm

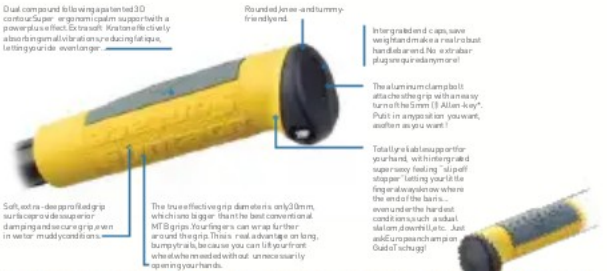

Electronic Warning Bell
This grip features a built-in electronic bell.
The button is conveniently positioned near your thumb.
One pressand the bell rings to alert people and traffic in front.

Screw-On Gripz Moto

Nothing slips...not your grip, not your hand!

Weight (incl. intergrated plug)	118g
Effective weight for comparison	113g
Grip width	135mm
Handlebar Ø	22.2mm
Outer Ø Grip	30.0mm
Colors	Black,Cool. Grey,Hot Yellow,Ferrari Red

Syntace

The Secret...
is inside: A slotted, 3D shim made of fiber-reinforced nylon, plus a robust clamp bolt, build the inner core of this grip. The core is then covered with an dual compound Kraton rubber (int. Patent).

The Assembly...
Screw-on Gripz slide onto your handlebar with ease. Just turn the grip to the desired position (we recommend mounting such that the cross hairs of the Moto logo lie in line with the extension of your arm), tighten the bolt*, and you're finished!

The Result
Extremely compact shape making the Moto Screw-on Gripz super light: One grip weights less than 60g... including the intergrated hard core end cap! Absolutely no play, slip or twisting of the grip on any handlebar. Put it on and take it off in seconds, as often as you want!

* You only need the one famous 5mm Syntace Allen-key (Syntace one-key design), because nobody likes to haul around tools on a ride! Additional feature: the Syntace Key intergrated 3Nm torque when holding the short end. Keep it simple stupid: No loose components or tiny screws to lose. Ingeniously simple and robust.

SYNTACE

VLG 977AD3
VLG 979AD3

L: 135.7 mm

- One Side Locking System
- Triple Density
- Color Option: Multiple Colors - Over 100 color

Syntace

VLG 977AD3

Raised Gel Pad
Delivers additional grip control where the palm contacts the grip.

5mm Allen Bolt
Uses standard 5mm allen key for adjustments, eliminating the need for more tools.
