Aero efficiency is key to the Oltre XR4 Disc, and this extends to the new Metron 5D ACR aero handlebar featuring fully-enclosed cable routing through the handlebar itself and stem – for the hydraulic brake hoses and the gear cables.

AERO SEATPOST

Aero seatpost with integrated look and adjustable head clamp offset 25mm or -10mm.

FULL CARBON INTEGRATED HANDLEBAR

The handlebar is designed as a single lighweight carbon element with integrated cable system.

INTEGRATED LIGHTS

Attention to rider's safety and well-being is key to the Bianchi Lif-e project. With this in mind we have designed the new e-SUV with integrated front, side and rear led lights. Integrated lights are available on the Rally and Adventure models only

ADVANTAGES:

- Improved visibility during night time or low light conditions
- See and be seen in case of urban commuting trails

ONE MODEL. THREE VERSIONS.

E-SUV RACER
The e-SUV Racer benefits from a purity of purpose and industry-leading componentry, making it a true winner. It is designed, without integrated lights and fenders, for the hardcore racer, the rider who loves feeling the thrill of speed and conquering the toughest trails. One of its standout features is the integrated handlebar and stem system, designed in-house at Bianchi. 29er wheels are full-carbon, 150mm rear travel and 160mm front travel.

E-SUV RALLY
The e-SUV Rally can take on anything and go all night. It is less about competition and more about exploration and enjoyment, and to that end it boasts integrated lights and fenders. The supplementary front light throws out 1,100 lumens with a 200m beam, more than enough for you to ride technical trails well into the night. The Rally also has a 29er front wheel paired with a 27.5 back wheel, providing great grip and comfort from the back, and letting you really throw your weight forward when you want more traction and precision.

E-SUV ADVENTURE
The e-SUV Adventure was created for challenging off-road trails, but it can also handle urban riding with ease. Let the name of the model fuel the fires of your inspiration as you seek out new, uncharted routes. Like the Rally and the Racer, the Adventure has a Shimano motor and 720Wh battery – massive power and lifespan to truly unlock those far-flung places. It also boasts a full-carbon frame and integrated lights and fenders, just like the Rally model.

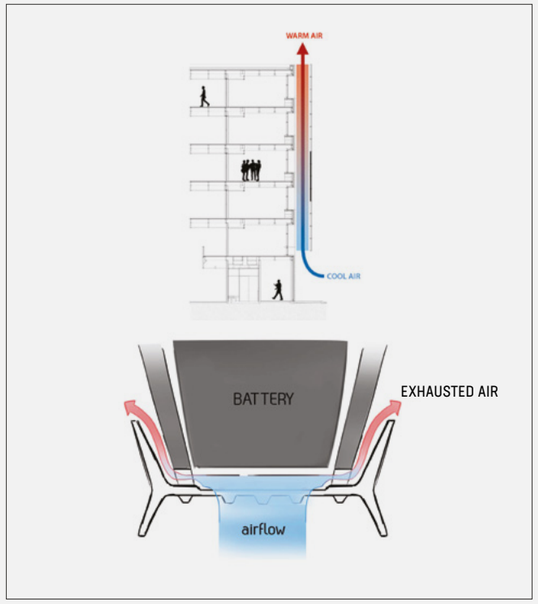

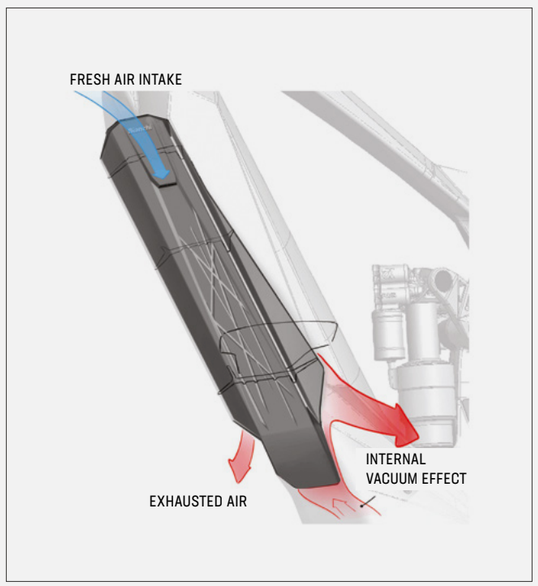

ASYMMETRIC CHAINSTAY

- Prevent chainstay damages
- Decrease the noise from the chain hitting the frame
- Aesthetics

COOLING SYSTEM

The Bianchi SUV features a 720Wh fully integrated battery. The battery cover features a unique cooling system inspired by the self ventilated facades in modern architecture. It works as a forced air vertical duct that prevents the engine and the battery from overheating. An intake allows the fresh air to enter from the top. The fresh air flows trough an internal duct above the battery and escapes from the bottom. This flow works as a vacuum system and reduces the heat of both the battery and the motor.

IMPROVED TRAVEL

The all-new carbon frame is built exclusively for use with 1x drivetrains, so you can keep spec weight to a minimum, and it comes in 15", 17", 19" and 21" versions. As you'd expect with a competition-crushing race bike, the frame has internal cable routes and is dropper post-compatible. It runs up to 29x2.4" tyres and has a Boost 12x148TA rear axle.

CLEARANCE

Improved clearance in the chainstays allows to accomodate larger tyres up to 58mm width in wet, muddy conditions.

LARGER TYRES UP TO 58mm

DRIVETRAIN

The Methanol CV RS is now 1x drivetrain specific.

XCO RACING GEOMETRY

The frame shape and structure saves weight, improves steering response and accuracy. Geometry has been optimized to respond to the new faster, rougher race tracks by adding a longer reach and a slacker head tube angle. This creates a more confident feel for the rider at speed and a greater ability to attack the trail, especially in corners and steep descents.
