CIÖCC

The Italians have a traditional flair *for combining beauty and function in their racing machines. CIÖCC bicycles are designed and manufactured in the heart of Italy's racing country, then carefully hand-assembled and tuned to your specifications at Ten Speed Drive Imports. We guarantee that every CIÖCC is a masterpiece of workmanship, using only the finest Italian components to provide the perfect ride.*

All CIÖCC bicycles *are made from Columbus tubing including the new SLX tubing joined by the new short point investment cast designer conjunctions including fork crown, bottom bracket and lugsets. The components are various combinations of Campagnolo, Cinelli, Regina and Concor products, each chosen for their durability and high quality. The wheels are Ambrosio rims with Alpina spokes, and are custom assembled by Ten Speed Drive Imports to assure geometric precision.*

Suggested retail prices are subject to change and do not include shipping and final assembly.

CIÖCC Framesets *are made exclusively of Columbus seamless cold drawn tubing joined together by beautifully designed investment cast lugs, bottom bracket, and fork crown. Why Columbus tubing? Because no other tubing has ever been able to compare with Columbus for response, longevity, and just pure power transfer. CIÖCC, a handmade production frame specially prepared by Ten Speed Drive Imports. You are buying the best.*

All CIÖCC Framesets *receive special attention to detail and workmanship. Every frame is individually handmade and prepared to insure absolutely perfect road handling and efficiency. The design geometry of all CIÖCC framesets is pure Italian road racing while incorporating the features needed by American cycling. To bring out the best in a frame of this quality, Ten Speed Drive Imports recommends using one of our Component packages.*
