Quality & Economy

These three Clubrider frames are built to a fixed specification which we know will suit most people. Sizes range from 20" to 24" except for the Clublady which starts at 18½". No alterations to these specifications can be made except for additional brazed fittings and paintwork. These prices are additional and given in the Repairs and Renovations list

Harrier

Reynolds 531 tubing, short point cutout lugs, microcast fork crown and Agratti drop outs built with a short wheelbase and racing geometry, clearances for 700C wheels without mudguards, for the budget conscious rider. Fitted for twelve speeds with gear lever pip, underbracket tunnels, allan key brakes, cable guides and stops. Complete with headset and chrome seat bolt finished in stove enamel to your choice of colour.

Osprey

Similar specification to the Roadman but with mudguard clearance and touring geometry for a more comfortable ride over those longer distances. Also fitted with single bottle nuts and rear carrier eyes. Complete with headset and chrome seat bolt, finished in stove enamel to your choice of colour

Also available in a drop frame ladies' version

Hawk

Columbus Matrix tubing, short point lugs, short rake forks and Columbus track ends build up into a short, strong, responsive track frame for the keen beginner or experienced rider alike. Close clearance for Sprints or 700C wheels, no brazed fittings or brake drillings, allan key seat bolt. Complete with headset, chrome seat bolt and finished in stove enamel to your choice of colour

A Wide Range of Frames for all Cyclists....

Fancy engraving on crown and top eyes. Cinelli machined brake and chainstay bridges for strength and lightness to compliment the tubing. Concealed rear brake cable in toptube and rear gear cable through chainstay for that clean, streamlined look. Brazed on double lever bosses and tunnels, TA

Track Star

Reynolds 531C tubing, with long point lugs, Cinelli microcast bottom bracket and track crown with round taper short rake forks. Technociclo forged dropouts with double cut outs for strength and lightness. Single taper 'Tack on' seat stays with Harry Quinn logo engraved to match crown.*

bosses and tunnels, cable guides and stop, TA bottle nuts for single cage, chain hanger, allan key seat and brake fittings. Complete with Tange New Levin headset and finished in your choice of colour, stove enamelled

Professional

Reynolds 531P tubing, * Cinelli microcast bracket and 'Aero' fork crown with 'Laurel Wreath' engraving, Prugnat short point fancy lugs, Campag Super Record dropouts, 'Shoot in' or 'tack on' seat stays with engraving on top tyes to match crown. Brazed on double lever bosses and tunnels, cable guides and stops, TA bottle nuts for single cage, chain hanger, allan key seat and brake fittings. Complete with Stronglight A9 headset and finished in your choice of colour in stove enamel or flamboyant paint with lugs and engraving picked out

Supreme

Reynolds 531P tubing, * Cinelli microcast bracket, lugs and engraved fork crown plus custom forged brake bridge and chainstay bridge, Campag Super Record dropouts, 'shoot in' or 'tack on' seat stays with engraving to match fork crown, brazed fittings and headset as for the 'Professional' with choice of colours in enamel, flamboyant or metalic paint with lugs and engraving picked out

Futura

For Road or Track
Reynolds 653 tubing, combines the strength of 753 with the lightness of Professional tube. Built with lightweight short point lugs, microcast bottom bracket and Italian style fork crown which has the Harry Quinn 'Laurel Wreath' engraving. Fitted with Campag Super Record or Shimano Vertical dropouts and concealed rear brake cable, double lever bosses and tunnels, chain hanger, nuts for single TA bottle cage, allan key seat and brake fittings. Complete with Stronglight A9 headset and finished in your choice of colour in stove enamel or flamboyant paint with lugs and engraving picked out

* available in 653 tubing — see Price List for details

and brake fittings. Complete with Campag Chorus headset and finished to your choice of colour and paintwork.

Achilles Triathlon

Reynolds 531C tubing, * with long point lugs, microcast fork crown and precision forged bottom bracket. Designed to combine the response of a road racer with the comfort of a tourer specially for Triathlon riders. 'Shoot in' seat stays for strength and style, Campag Super Record dropouts, double lever bosses and tunnels, cable guides and stops, double bottle nuts, allan key seat and brake fittings. Tange Professional sealed headset and finished in your choice of colour with lugs lined to contrast

Easy Rider Tourist

Reynolds 531ST tubing with Prugnat long point lugs, microcast bracket and crown. Campag Super Record or Suntour Vertical dropouts with mudguard and pannier eyes and bosses. Double lever bosses and slides, pump peg, cable guides and stops, double TA bottle nuts, allan key seat bolt and brake fittings — cantilever brake fittings available. Complete with Tange New Levin headset and finished in your choice of stove enamel paint with lugs picked out. A comfortable ride for those longer distances

finished in stove enamel or flamboyant paint to your choice of colour with lugs and engraving picked out to contrast. A popular choice with track riders

Gaucho Mountain Bike

Reynolds 531 ATB tubing with special Haden lugs, precision forged bottom bracket and wide track fork crown for big tyre clearance. High bottom bracket and long wheelbase for negotiating rough terrain with ease and safety. Suntour forged mountain bike dropouts, brazed on cantilever brake bosses, cable guides and stops for handlebar control, allan key seat bolt and Tange MTB 225 headset. Finished in your choice of colour stove enamel. Also available in Reynolds 501 tubing. This mountain bike is chosen because it is unique

Tourist Tandem

Reynolds 531 tubing with round 'drain pipe' for strength, special tandem fork crown, Campag Record dropouts and long point lugs built into a double diamond configuration make up this fine touring tandem. Front eccentric bottom bracket and skillful building ensure maximum chain adjustment. Brazed on double lever bosses or eyes for handlebar control, all cable slides, guides and stops, double bottle nuts, pump pegs, pannier bosses and mudguard eyes, allan key rear seat bolt and brake fitting with optional cantilever brake bosses. Available in double gents, ladies/gents, level or dropped toptubes with a wheelbase designed to combine comfort with manoeuvreability. Complete with headset and finished in your choice of colours

Sport Tandem

Reynolds 531 double butted tubing with oval 'drain pipe' and twin lateral construction for strength and rigidity. A curved rear seat tube gives this tandem a remarkably short wheelbase and close clearances so important for responsive competitive riding. Prugnat special long point lugs, microcast Aero fork crown, Campag Super Record or Shimano Vertical dropouts, concealed rear brake cable in top tubes and rear gear cable through chain stay for that clean look. Brazings as for Tourist except for pannier and mudguard eyes, and pump pegs. Available in double gents only, complete with Stronglight A9 headset and finished in your choice of colours. Also available in Reynolds 753 R tubing

DESIGN : IAN FRANKLIN PRINTED AT THE DIMOND PRESS - PEMBROKE

Leaders in the fine craft of frame-building

When Harry Quinn started his cycle shop in 1890 little did he realise that he was founding a family business that would stretch three generations.

We are proud to be still making hand built frames nearly 100 years later and carrying on the tradition of craft, quality and workmanship started all those years ago.

Over the years our cycles have been ridden in all major national and international events and have won honours in:

The Olympic Games (Bronze Medal)
World Championships (Gold, silver and bronze)
Commonwealth Games (Gold and silver)
Tour of Britain (Three times winner)
Berlin, Warsaw, Prague Peace Race

All our frames are built with Reynolds or Columbus tubing — or any other quality tubing to suit your specification. And we use top quality components. The 753 frames are silver brazed so as to maintain the strength of the tubing. In fact we were only the second builder in the world to receive approval from Reynolds to use this fine tubing.

Trophy Low Profile

Columbus SL 'Kronos' tubing, similar to the Medalist but with curved top and seat tubes to make a very short frame with wheelbase starting from 35". The ultimate in low profile frames. Concealed rear brake and gear cables, available for 700C, 650C or 600C size front wheels. Complete with Tange New Levin headset and finished in your choice of colour. Suitable for 5/6 speeds only. The Trophy makes an excellent track frame.

Finish is always highest quality stove enamel, flamboyant, polychromatic or the latest opalescent paints. Of course you choose the colour, and you can choose chrome plating.

Being a custom builder in the unique tradition of British craft every frame is built to order. This brochure can only give you some idea of the possibilities open to you. Nothing is 'off the shelf.' Everything is as you want it. And remember — we can build complete cycles with components of your choice.

We would be delighted to hear from you — in person, by telephone or letter and talk about your new frame or complete bike. Why not use our experience to your advantage. Buy a Harry Quinn frame.

Victory Time Trail

Reynolds 531C tubing, * double curved seat tube for ultra short rear triangle and compact frame. Shimano vertical dropouts, microcast bottom bracket and integral fork crown with Harry Quinn logo, neat short point lugs and 'shoot in' seat stays. Brazed on gear lever boss, cable guides and stops and under bracket tunnel. Allan key seat and brake fitting, complete with headset and finished in your choice of colour. Suitable for 5/6 speeds only.

Medalist Low Profile

Reynolds 531C tubing,* Columbus lugs, microcast bottom bracket and fancy engraved aero fork crown and 'short rake' blades fitted with Shimano vertical dropouts. Allan key seat and brake fittings, brazed on lever boss and tunnel under bottom bracket, concealed rear brake cable in top tube. Built for 700C, 650C or 600C size front wheels. Complete with headset and finished in your choice of colour. Recommended for 5/6 speed only. Also available as a track frame.
